AIR FORCE

INCENTIVE PAY DISCUSSED:

ARDC Commanders Will Act On New Manpower Proposals

L. GEN. Bernard A. Schriever is directing a command-wide drive "to achieve the greatest possible utilization, effectiveness, retention and morale" among military men and civilians in the Air Research and Development Command.

With a priority pace, a special ARDC task force has been surveying such problem areas as forced retirement policies, promotion programs, "blue suit" capabilities, and technical-management pay for officers with advanced degrees.

The ARDC Commander has placed so high a priority on his "Accent On People" concept that he will devote the June ARDC Commanders Conference exclusively to this problem.

General Schriever's imaginative campaign to raise the career opportunities and professional stature of ARDC members, military and civilian, comes at a time when

New WADD Chief Receives His Second Star

MAJ. GEN. Joseph R. Holzapple, right, ARDC Director of Systems Management at Wright Air Development Division (WADD), Wright-Patterson AFB, Ohio, receives a second star from Lt. Gen. B. A. Schriever, ARDC Commander. General Holzapple will succeed Maj. Gen. Stanley T. Wray as WADD Commander in July.

HISS ACT HURTS

Thousands of military men face a "gross injustice" in loss of retired pay because it has been ruled they come under the Hiss Act.

As The Journal went to press, the Pentagon was pleading for remedial legislation to prevent a drastic impact on Service morale.

Turn to Page 5 for details.

Navy Nominations Sent To The Hill

The President has nominated hundreds of Navy officers for permanent promotion, including 314 to the rank of captain.

Page 6

A Lucky 13th For Many Air Force Officers

The Air Force announced on 13 June the names of more than 1850 majors and lieutenant colonels chosen for temporary promotion to lieutenant colonel and colonel.

Pages 8, 9

Retired Pay And Five Purple Hearts

A retired Army major general has written THE JOURNAL an illuminating letter on the problem of pay injustice for thousands of military men. He makes the striking point of an instance in which a much-decorated brigadier general, who received five Purple Hearts for wounds in combat, draws the same pay of a colonel.

Page 10

"Turkey" Shoot" On Capitol Hill

Congress will need to take rapid-fire action on dozens of military bills in order to beat the election year rush to adjournment. Pending legislation affects scores of thousands of Service people.

Pentagon Asks USCOA Ban On 'Poor Risks'; Seeks Sweeping Changes In Annuity Plan

(Retired Under New Attack, Page 35)

THE Pentagon, after 2½ years of study and revision, finally has sent Congress—too late for action this year—a proposal urging sweeping changes in the Uniformed Services Contingency Option Act.

The proposed changes, affecting thousands of Service families, first were recommended to the President in January 1958 by a civilian Board of Actuaries responsible for monitoring the annuity plan.

ARMY-AF VIEWS DIFFER:

Hundreds Lose Service Credit

HUNDREDS of Air Force officers integrated as Regulars following WW II may be forced to recompute their years of creditable Service for retirement purposes.

The Comptroller General has ruled that they cannot count the period between the time of appointment in the Regular establishment and the time they accepted that appointment as "creditable service" for either voluntary or mandatory length of service retirement provisions.

Officers affected were integrated into

—Continued on page 28

HOUSE MUST CONCUR:

Senate Saves 2,000 Rated

THE Senate Appropriations Committee temporarily has saved almost 2000 rated officers from being forced off flying status beginning 1 July.

The action can only be called "temporary" because it is subject to the approval of House Appropriations Committee members who ordered a larger cut-back.

The House group cut \$30 million from the Defense Department's proficiency paying money for fiscal '61, and set a ceiling of 97,546 on the number of officers who can be retained on flying status.

The Senate Committee restored \$15 million of the House cut and raised the

—Continued on next page

Although the measure presented to Congress has been revamped somewhat, it still contains the major recommendation made by that Board: elimination of "poor risks" from the program.

Such "risks" are those retired for disability before completing 18 years of service. This group now makes an election without advance notice, and accordingly "there is a strong tendency for the poorest risks in this category to elect," the Pentagon said.

As a result, USCOA's mortality experience has been "many times greater" than initially predicted.

To improve the situation, the Pentagon proposes to exclude members retired for physical disability with less than 18 years' service from participation in the normal annuity program. They would, however, be permitted to elect under a new program designed to assure their survivors either (1) a

—Continued on page 3

Submariner Heads Global Signal Net

ADM. William D. Irvin, USNA '27, a submariner who has been in command of the Atlantic Fleet Operational Test and Evaluation Force, will be the first Chief of the Defense Communications Agency.

Established by Secretary of Defense Gates last month, the Agency will operate the Defense Communications System, which will centralize all DoD long-haul communications requirements.

Admiral Irvin will be responsible directly to the Secretary through the JCS.

The Pentagon said that assumption of

SERVICES OPPOSE PLAN:

Legion Surveys Military Recruiting

THE American Legion is considering a proposal which would end recruiting by the Armed Forces.

This mission would be assigned to the Selective Service System under a plan which is now circulating throughout the Legion's 56 departments for comment.

If the reaction of the Legion groups is favorable, the organization's Security

—Continued on page 17

Senate Action Would Keep 2000 Service Officers On Flying Status

From first page—

ceiling on rated officers to 99,362.

The Senate Committee, upon the recommendation of the Pentagon, exempted flying student officers from the limitation. The House previously had exempted Reservists on active duty for training, and officers receiving flight pay under the 20-year-of-rated-service provisions of former appropriations bills.

The Senate Committee, in raising the ceiling, also established an effective date of 1 January 1961 "to permit the Department to provide an orderly procedure to implement this section."

As of 31 December 1959, 101,178 rated officers were on active duty in the

Armed Forces. The House ceiling would have eliminated 3,632 of these officers from flying status. The Senate ceiling would eliminate 1,816.

Of this number, some can be placed in the "over-twenty" category where they will continue to receive flight pay although not required to fly.

However, Air Force Chief of Staff General Thomas D. White has told the Committee that the Air Force has only about 1,000 rated officers in the over-20 category and that many of these are "in key positions which require that they remain on active flying status."

The Navy and Marine Corps told the Committee that since they already have

placed a large number of their officers in the over-20 status, they did not feel that the House criticism was aimed at them.

The Army said it has no officers who have been rated for over 20 years.

General White had told the Senate Committee, prior to its action in raising the House ceiling, that the Air Force would be able to absorb about \$8 million of the cut in proficiency flying funds, by reducing normal flying activities of approximately 3,000 rated officers, including the thousand in the over-20 category.

The Senate restored more than \$9 million, leaving the Air Force with a reduction of \$12,360,000.

Admiral Arleigh A. Burke, Chief of

Naval Operations, had told the Committee that the cut would wipe out 60% of Navy and Marine Corps flying funds. The Committee restored \$4,620,000 of the House cut, leaving the Navy and Marine Corps with a reduction of more than \$2 million.

Secretary of the Army Wilber M. Brucker had warned the Senators that the House cut would force an "inequitable" reduction on the Army's air arm. The Committee restored all but \$570,000 of the Army funds. The House had chopped out \$1.8 million.

SAC WIVES TOLD:

Preserve Husbands, Don't Remake Them!

THE Strategic Air Command is distributing "An Appeal To Wives," written by Col. Thomas H. Crouch, Medical Group Commander at Carswell AFB, Tex.

He tells SAC wives what they can do to give husbands "a feeling of security and importance." Says Colonel Crouch: "Don't try to remake him. Just try to preserve him."

The text of the colonel's advisory is published on Page 26.

NEXT WEEK:

Annual Directory; Return To Quantico

THE JOURNAL issue of 25 June will feature the 26th annual Procurement Directory, widely used by Armed Forces procurement officers.

An on-the-scene report from the annual Secretaries Conference at Quantico, Va. will be another highlight of next week's issue. THE JOURNAL has covered these sessions each year since they began in 1953.

Col. Shelley Area Engr. At Keflavik

Col. Sidney Shelley has been named Army Corps of Engineers, Eastern Ocean District Area Engineer at Keflavik, Iceland.

Col. Carlin H. Whitesell is District Engineer.

Colonel Shelley is married to the former Anne Cecelia Fey of Duquesne, Pa. Mrs. Shelley and their three daughters, Barbara, 17, Sandra, 15, and Sarah Anne, 7, live at 4762 Mitchner Street in Lawrence, Indiana.

V.M.I. TO GERMANY

Col. Glover S. Johns, Virginia Military Institute Commandant of Cadets at Lexington, will go to Germany next month to command a Seventh Army battle group.

Colonel Johns, a '31 graduate, came to VMI in 1956 as PMST and the following year became Commandant, while continuing as PMST.

Col. Spencer Will Get Plans Post At AMC Hdqrs.

Warner Robins Air Material Area Deputy Commander and Robins AFB, Ga. Base Commander, Col. Norman C. Spencer, jr., will be reassigned to Air Materiel Command Headquarters at Wright-Patterson AFB, Ohio.

He will become the AMC Deputy Director for Plans and Programs.

His successor will be Col. Castex Conner, serving in a similar position at the Gentile Air Force Station in Dayton.

A '36 USMA graduate, Colonel Spencer came to Robins in September 1958 from Sondrestrom AB in Greenland where he had been Base Commander.

Amend Survivors' Benefit Plan

18 June 1960 (Vol. 97, P. 1189)

Army Navy Air Force Journal

3

From first page—

USCOA annuity, or (2) the benefits of the Survivor Benefits Act.

The Board of Actuaries in making its 1958 report, related a "sizable number" of cases "where disability retirement was effectuated when the individual was on his death bed, or where the Boards for Correction of Military and Naval Records made ex post facto determination." The Actuaries recommended that such boards should "not have the powers to do such things as make elections for individuals already deceased."

The proposal sent to Capitol Hill by Deputy Defense Secretary James H. Douglas, would permit members of the Reserve components to make a USCOA election even though not in the "active reserve." Comptroller General decisions currently preclude such elections.

Here are other features of the proposed legislation:

At present, the law provides that an election must be made before completion of 18 years' service for which the member is entitled to credit in the computation of his basic pay. This limitation is continued in effect, but is amended to provide that if a member fails to make an election before the deadline date, he may make it at a later date. The election will not be effective if he is retired or granted retainer pay within three years of the date of the election.

A new program of annuities is established for nonservice-connected death under which an election may be made at the time of retirement.

In situations where a member fails to make an election as a result of military operations, assignment to an isolated station, is missing, interned in a neutral country, captured by a hostile force, or beleaguered or besieged, and for that reason is unable to make an election before completing 18 years' service, he will be granted a one-year period from the date after his return within which to make an election. This election will have the same force and effect as if the member had made it prior to the completion of 18 years' service.

Under present law, a change or revocation of an election is not valid unless the member serves at least five more years before retiring. The new proposal reduces this 5-year period to three years for those with more than 18 years' service, and eliminates it for those with less than 18 years' service. Persons who have been determined mentally incompetent (and for whom the Secretary of their Service has made an election) would not be affected. A revocation once made could not be revoked or withdrawn, but a member who revokes could make a new election under regulations prescribed by the Secretary.

As presently interpreted, the law prevents members to whom retired or retainer pay is granted retroactively from participating in the USCOA program unless they had made an election prior to the time the retired pay is awarded. The new proposal provides that an election in such cases may be made within 90 days after the member receives notification that he has been awarded such pay.

Another change to the 18-year election requirement would affect Reservists only. Members not on active duty and who may be retired or become eligible for retired pay under Chapter 67, Title 10, U. S. Code, would be permitted an election up to the day before their 57th birthday. This would provide a three-year period prior to the effective date of retirement, and would obviate the need to maintain records on Reservists who are not on active duty for long periods of time.

Members who already are participating in USCOA, or those who elect to take part in the program in the future, would be permitted to withdraw if they find that they are suffering financial hardship because of their USCOA contributions. They would, however, receive

no refund of the contributions which they have made to the program.

Changes also are recommended in the "multiple options" feature of the Act.

At present, a member is permitted to provide an annuity for his wife for not more than 25% of his reduced retired pay and an annuity for his children for not more than 25% of his reduced retired pay, provided the combined amounts do not exceed 50% of the reduced retired pay. The reduced retired pay is the amount of the retired pay less the cost of the annuity. Under the proposed changes, the total of the "mul-

CAPT. HESSEL NEW SKIPPER FOR FDR

CAPT. Hugh Winters has been relieved by Capt. Edward W. Hessel as commanding officer of the Sixth Fleet attack carrier Franklin D. Roosevelt.

On hand for the ceremony were U. S. Ambassador to Spain John D. Lodge, Sixth Fleet Commander VAdm. George W. Anderson, Jr., and RAdm. Robert E. Dixon, Commander, Carrier Division Four. Guests also included the governor and mayor of Palma, the American consul general of Barcelona, Spain, the captain general of the Balearic Islands and the commanding officers of other warships in the area.

Captain Hessel comes to the FDR from the oiler Navasota (AO-106), where he served as commanding officer. Captain Winters leaves to become CofS for the Commander, Naval Air Force, Atlantic Fleet.

TWO STRIKES ON THE OPPOSITION

When SAC's B-52 crew steps up to the mound it can throw two deceptive curve balls before winding up to deliver the third strike. Two GAM-77 HOUND DOG air-to-surface missiles slung beneath the wings of the B-52 intercontinental bomber can quash enemy defense centers and clear a path to the main target.

Blazing into action at supersonic speeds, these GAM-77's can be used either on resistance points or on the main objective itself. Inertially guided, they can fox enemy radar by making passes at pseudo-targets before heading for the actual one. To further confuse the opposition, the jet-powered missiles can fly high or low on the way to the strike zone.

The GAM-77 HOUND DOG was designed and is in production for SAC by the Missile Division of North American Aviation.

General Bradley Pins Eagles On Col. Twomey

GENERAL of the Army Omar N. Bradley pins a colonel's eagle on the shoulder of Lawrence A. Twomey, a patient at Walter Reed General Hospital since 7 March. He was promoted to his new grade last week along with 34 other officers.

New Army Colonels

Four Army lieutenant colonels were promoted to temporary colonel in S. O. 121, effective 13 June.

They are Herbert V. Mansfield, Inf.; Stephen J. Meade, Inf.; Emil L. Mosheim, QMC; and Salvador F. Taranto, Arty.

They extend through Number 330 on the list in Circular 624-73, dated 23 November 1959.

Col. Dehne Named SGO Consultant

Colonel Edward J. Dehne, Chief of Preventive Medicine, Office of the Second Army Surgeon, Ft. Meade, Md., has been named as Consultant to The Surgeon General of the Army in the specialty fields of Preventive Medicine and Occupational Medicine.

Colonel Dehne was certified as a member of the Founders Group in Occupational Medicine in 1955, and was previously certified in 1949 by the American Board of Preventive Medicine and Public Health.

His oldest son, Capt. Donald L. Dehne, is on active duty with the Air Force at Norton AFB, Calif.

His younger son, Denis E. Dehne, age 19, is a second-year Cadet at the Air Force Academy.

Congressman Sikes Promoted To Brig. Gen. In Army Reserve; 30 Others Nominated

REPRESENTATIVE Robert L. F. Sikes (Fla.), third-ranking Democrat on the House Military Appropriations Subcommittee was nominated by President Eisenhower 13 June for promotion to Brigadier General in the Army Reserve, along with 30 other Reservists and National Guardsmen named for promotion to major general and brigadier general.

Colonel Sikes holds his Reserve commission in the Chemical Corps. He will complete 20 years' service in the Congress this year. A son, Lt. Robert K. Sikes, is on active duty in the Air Force.

The entire slate of nominees follows. ANG officers are designated by an asterisk; others are USAR.

Thousands In Services Face 'Gross Injustice' Pay Loss Under Hiss Act

THOUSANDS of career Servicemen, who have been convicted of minor offenses by "inferior" military courts have lost entitlement to retired pay.

The "gross injustice," as it has been labeled by the Defense Department, stems from the so-called "Hiss Act" passed by Congress in 1954.

This Act was designed to bar former State Department official Alger Hiss from receiving government benefits after he had been convicted of perjury in a widely publicized case.

In drafting the measure, however, the Government did not confine its actions to Mr. Hiss, or to cases involving National Security, but wrote an all-embracing measure covering all Federal workers and dozens of unlawful acts.

In the six years since passage of the Act, it has resulted in many cases of unexpected and, in the words of the Budget Bureau, "unwarranted hardships," to both employees and survivors.

The Government has asked that the Act be substantially rewritten so as to remove certain "offending provisions" and confine the penalties of the Act to security cases.

The suggested change has been approved by the House and by the Senate Post Office and Civil Service Committee, but was recommended to the Senate Committee after a heated floor argument in which some Senators objected to the Government's making any kind of payment to former employees convicted of crimes.

Gathering new evidence to take the measure back to the Senate floor, the Post Office and Civil Service Committee has asked a number of top Government agencies to restate their views on the new bill.

Defense Department General Counsel J. Vincent Burke, jr., has revealed in his reply that thousands of military men will lose their retired pay under the Act even though convicted of offenses which drew only "reprimands or small fines."

He cited several cases of the "harsh effect" of the Act.

One involves a sergeant who, while driving a Government vehicle on a scheduled route, deviated .8 of a mile off that route. He was tried by a summary court-martial and reduced to a lower grade.

Under the Hiss Act, he has lost entitlement to pay valued at almost \$33,000.

In another case, a sergeant was convicted by a deck court of unauthorized use of a government vehicle, and "for his minor offense he has lost retirement pay valued at \$38,922," General Counsel Burke reported.

Another example cited was that of a chief warrant officer who was reprimanded and made to forfeit \$400 for an offense to which he had pleaded guilty. Mr. Burke said this officer "will lose retirement pay estimated to be worth \$103,000."

The Defense Department General Counsel said cases such as those cited "will number in the thousands."

He noted that the "harshness" resulting from the Hiss Act "was never intended by the Congress. If remedial action is not taken, it will undoubtedly have a drastic effect on the morale of our

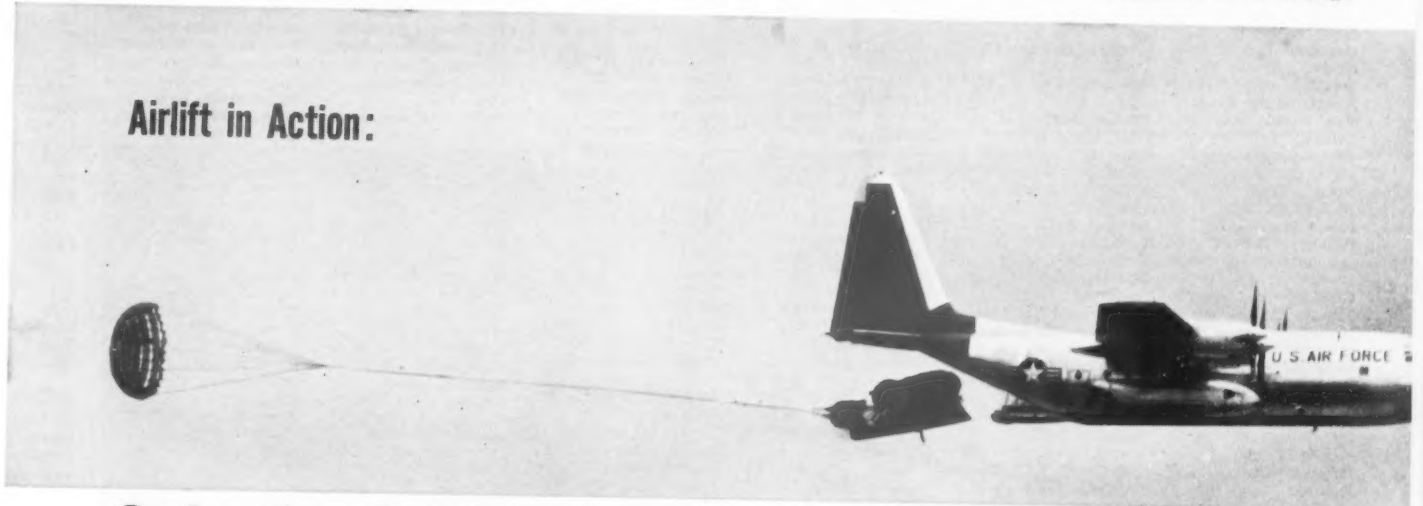

Armed Forces. As in the case of Chief Warrant Officer "P" above, even the attorneys in the case evidently did not realize that a plea of guilty would result in a loss of retirement pay valued at over \$103,000."

As it applies to the Services, the Hiss Act bars retired pay for any member of

the Armed Services who has been convicted of any offense before any type of military court, regardless of the sentence, provided that the offense would have been punishable by at least a year and a day in jail if he had been convicted

—Continued on next page

Airlift in Action:

Only the C-130 paradrops 'dozers and graders

...to clear its own landing strip

The C-130 was designed for the rough-and-ready realities of military airlift, built to land on improvised strips near the front. But there are jungle glades and mountain meadows too short and too rough for even the C-130. That's when the call goes out for a bulldozer—and a C-130 to drop it.

For the C-130 was also built to paradrop practically anything. From the giant 9 x 10 foot door beneath its upswept tail, it can float the largest tractors, trucks, and tanks down to earth.

It takes a minimum of bulldozer work to make an "airhead" for a C-130. Uproot a few trees, scrape off a few high spots and fill a few potholes, and you've got a terminal for transoceanic non-stop flights that average 370 mph, carry 20 tons of cargo or 92 combat-ready troops.

Another reason why the Lockheed prop-jet C-130 HERCULES provides more Jet Age airlift per dollar than any other plane now flying, now being produced, now scheduled for production.

Johnson, Tom R (CEC), DPWO 13ND; to DepDistPWO 13ND.

Hiss Act

From preceding page—
by a civilian court.

In order to maintain discipline many members of the Armed Forces are tried by courts-martial and given appropriate punishment, such as reprimand or small fines, for minor infractions of the rules. General Counsel Burke said, "To apply the Hiss Act to these cases, 'is in our judgment a gross injustice to the man and his family.'"

RETIRED ADMIRAL OR GENERAL FOR SALES MANAGEMENT POSITION

Strong financial institution specializing in serving the military desires man for associate managing director of a sales organization of retired military officers. Work covers serving active duty personnel and their families throughout the world.

Complete facilities, salary and travel expenses combined with well-planned sales training program assure a profitable and successful endeavor.

Must be in good health, vigorous, ambitious, imbued with the desire to continue to serve and associate with fellow officers and families. Remuneration commensurate with effort, time and ability.

Should be capable of working through defense department with each branch of service; military installations at all echelon levels, creating prestige and confidence among personnel in program and helping salesmen associated with the organization become well established.

Replies will be handled in strict confidence.

SERVICE

... TO THE FAMILIES OF THOSE WHO SERVE

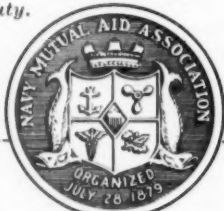

For 81 years—since 1879
the Navy Mutual Aid
Association has been providing
insurance protection and aid to
dependents of deceased officers.

Five different plans of permanent insurance protection (\$7,500 plus \$2,000 terminal dividend) is provided as near to the actual net cost as possible. More than 29,000 of your fellow officers are now sharing in these substantial savings in life insurance and other advantages and benefits so necessary to your family in time of need or death.

Available to all active duty officers not over 62 years of age of the Navy, Marine Corps and Coast Guard including Reserve Officers on extended active duty.

Benefits in Force \$200,000,000
Assets \$ 45,000,000

L/G Heaton Leads AMA Service Panel In CBR Warfare Discussion At Miami

THE increasing threat of chemical, biological and radiological weapons in future warfare was brought home to the Nation's civilian and military physicians 15 June at the annual meeting of the American Medical Association in Miami.

In leading a CBR panel, Lt. Gen. Leonard D. Heaton told the AMA that the possible use of these weapons by an enemy "is certainly no secret."

The Army Surgeon General stressed that the "military forces of the United States must recognize every possible weapons system that might be employed by a potential enemy and prepare accordingly."

Further detailing the threat of CBR weapons, Brig. Gen. Joseph H. McNinch, Army Medical R&D Commander, pointed out that chemical and radiological weapons have already been "tried and proven."

General McNinch said the fact that a biological weapons system "has not been successfully tried and proven under conditions of war does not mean that, if and when a test is ever made, it will not be just as effective as the other two."

"In the field of ionizing radiation," General McNinch said, "a tremendous amount of research is going on. This is justified because not only is this a component part of a weapons system, but it is a peacetime hazard also, one which increases geometrically with the passage of time."

It has been known for some time, the R&D Commander pointed out, that some chemicals will protect small animals from otherwise lethal doses of radiation, but it was only recently that a chemical compound was developed which might be effective in protecting man against such radiation.

Protection against radiation, he continued, "will almost surely be partial and relative, but if man can achieve protection against double the average lethal dose of ionizing radiation, this would be a great advance, and have useful applications in peace and war, and in the latter situation, could save thousands of lives and mean the difference between victory and defeat."

The number of chemical weapons which can be made by man, General McNinch said, is theoretically unlimited. This presents the problem of what weapons the U. S. must be prepared to defend itself against.

"In the absence of a reliable source of information about the capabilities and intentions of potential enemies," the most practical approach to the defense problem is research to discover the most effective chemical weapons, followed by additional research to discover prophylactic mechanisms and means of adequate

NAVY SAILS TO MEDICAL MEETING

THE Navy sailed into the American Medical Association's annual convention this week in Miami armed with an array of its most learned physicians and one destroyer.

The destroyer John Paul Jones, under Cdr. C. D. Griffin, USN, tied up at Pier 3 of the City Dock in Miami to allow AMA members to view Navy medicine as practiced by seagoing medical officers.

Arrangements for the John Paul Jones' visit were made by RAdm. Bartholomew W. Hogan, Navy Surgeon General, who also headed the Navy's medical participation in the convention.

As part of the program, RAdm. Calvin B. Galloway, Assistant Chief of the Bureau of Medicine and Surgery, moderated a discussion of the clinical aspects of radiation exposure. Discussion participants were Capt. E. R. King, Chief of Radiology at the Bethesda, Md., Naval Hospital, Capt. George W. Hyatt and Cdr. William McFarland.

The challenge of silence

The wide and deep sea is a near-perfect hiding place . . . and an infinitely mobile missile launching pad. This makes anti-submarine warfare a high-priority defense problem.

Not just the sea, but the surface and the air as well, comprise the theatre of ASW. And in all these areas, Sperry is making advanced contributions: submarine sonar detection gear . . . submarine fire control systems . . . submarine depth and maneuvering controls . . . countermeasures and counter-countermeasures . . . sophisticated navigational computers for helicopters, capable of programming a systematically precise sub search . . . automatic flight controls for the helicopter to permit it to do its job despite the vagaries of weather or mis-

sion complexity . . . for surface ships, precision torpedo fire control and hydrofoil stabilization and control systems.

Most of today's ASW programs utilize sound radiation techniques. But being explored are myriad "unsound" techniques of sea-hunting, vast new frontier for scientist and engineer . . . investigations in the electro-magnetic spectrum . . . development of advanced transducers, data processors, and means of displaying data that is gathered.

These anti-submarine warfare programs, ranging through the three dimensions of our environment, typify the integrated capability of the Sperry organization today. General offices, Great Neck, N. Y.

SEA • SURFACE • AIR • AEROSPACE

Air Force Lieutenant Colonel Selections Range From 1938 To 1947 Service Dates

THE following are the names of 1435 Air Force line majors chosen for temporary promotion to lieutenant colonel. The first 714 were promoted to the new rank effective 13 June. The others will be advanced as vacancies permit.

Three WAF officers are the most senior on the list, Martha L. Ambruster, Leonara E. Embich, and Marguerite L. Roux. Their PLSD/TAFCSD is from 1938 for the first named, and 1939.

Number 4 on the list also has a 1939 date.

Numbers 5 through 1283 have dates in 1940 and 1941.

The 1942 group extends from 1284 through 1311.

The 1943 group extends from 1312 through 1355.

The 1944 group includes Numbers 1356 through 1402.

In the 1945 category are Numbers 1403 through 1430.

Then there is a jump to John J. McCarthy, jr., whose date is 19 October 1947.

Here are the names in sequence number. (An asterisk indicates Reserve).

AF Promotes 35 To MC Lt. Colonel

The following 35 Air Force Medical Corps majors were promoted to temporary lieutenant colonel effective 13 June.

The junior man on the list, Charles E. Berry of Air University, held rank as a major from 1 September 1955. Numbers 29 through 34 also had dates of rank in 1955.

The first two selections held rank from 1950, 3-14 in 1952; 15-25 in 1953; 26-28 in 1954.

All are Regulars with the exception of Joseph M. Ganey.

Medical Corps Colonel Rank Awarded 22

The Air Force named 22 Medical Corps lieutenant colonels for 13 June promotion to colonel. The junior man on the list is Col. Francis F. Fardy of USAFE, a Reserve officer, who held rank as a lieutenant colonel from 28 November 1955.

Here is the list of promotions, with seniority indicated. An asterisk before a name indicates Reserve status.

5 Ayars, Laurence S.
14 Borah, William N.
* 9 Clough, H. T., jr.
* 22 Fardy, Francis F.
4 Fisher, Gordon F.
15 Grant, Lee B.
10 Greider, Lester S.
21 Hernquist, W. C.
20 Karmany, W. H.
17 Kurland, A. M.
* 16 Lafon, William F.

18 Lifton, S. E.
7 McKelg, M. C.
* 2 Morgan T. L.
12 Park, Oakley K.
11 Peters, Don P., jr.
3 Rothrock, V. M.
6 Sabn, G. M., jr.
13 Stuart, L. D.
19 Sutherland, L. R.
8 Veit, John P. A.
* 1 Wolf, F. S.

USAA offers substantial savings on automobile insurance to eligible officers of the U.S. Armed Services.

SAVE 38.8%* on Automobile Insurance

*off standard rates, stateside

USAA, organized in 1922, is a non-profit insurance association managed and directed by active and retired officers of the U.S. Armed Services. Over 350,000 members now enjoy liberal savings on their USAA insurance, including Comprehensive Personal Liability, and Household and Personal Effects Insurance. To save costs, selling by mail. Write today for details.

Medical Service Eagle Promotions

Six Medical Service lieutenant colonels were promoted to colonel, James J. McInerney of USAFE, who holds a date of rank as lieutenant colonel of 8 April 1955, was the junior man on the list.

In order of seniority, the other new colonels are Joseph E. Hodge, Cardis W. Bryan, Gerald Edwards, Charles W. Haines, and Austin S. Hall.

Air Force Promotes 350 Line Officers To Colonel

THE following are the names of the 350 Air Force line lieutenant colonels, from among 6027 eligibles, who were promoted to colonel effective 13 June.

Major commands nominated 1195 to the Central Board.

The dates of rank as lieutenant colonels range from 29 March 1944 to 5 November 1955. (Permanent Colonel Promotion Plans, Page 31)

Analysis of the new promotions shows that Numbers 1-3 had 1944 dates of rank; 4-6 in 1945; 7, 1946; No. 8, 1947; and 9-11, 1949.

The 1950 group included 12 through 39, followed by the 1951 group, 40 through 138.

Beginning with Franklin L. Fisher, 139, the 1951 group extends through Keith A. Whitaker, 194.

First among the 1953 group was Fred D. McKinney, 195, and the last of the 1953 names was Claude C. McCutcheon, 245.

The 1954 group begins with Holly W. Anderson, 246 and extends through John P. McKinnon, 275.

The 1955 promotions begin with Paul D. Pohlen, 276, and end with the junior man on the list, William A. Slade of SAC, 350.

Eleven Reserve officers were chosen for colonel. They are indicated by an asterisk.

The use of approved and properly designed security systems is now a recognized standard in safeguarding our nation's security installations.

Automatic intrusion detection systems are designed to safeguard huge outdoor areas or a single room.

TELAPPROACH SYSTEM:

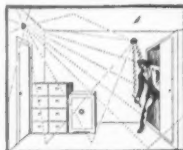

Electronic devices detect intruders who enter an electromagnetic field set up by antennas surrounding a restricted area.

INVISIBLE RAY SYSTEM:

Photoelectric devices detect intruders who intercept an invisible beam of light.

ULTRASONIC SYSTEM:

High frequency sound waves detect any one walking within a guarded area, and give an automatic alarm.

For more details on these and other types of security systems, phone the ADT office listed in your directory or write our executive office in New York.

18 JUNE 1960

President Will Get New View Of Far East Defenses

We hope that President Eisenhower will have the opportunity, during his Far East tour to see and assess the fine work being done there by personnel of the U. S. Armed Services and members of their families.

Spread out over half of the earth's surface, Army, Navy, Air Force, and Marine Corps members are the symbols of freedom and security in an area that is constantly under the shadow of Red China. In Korea and Viet Nam, armed forces of Communism and freedom face each other across truce-established lines under constant threat of new outbreaks. All over the Far East Communist agents strive to fan discontent and revolt.

But in each of the countries the President is visiting—the Philippine Republic, Nationalist China, Republic of Korea, Japan, and Okinawa—there are U. S. military personnel working with the local governments and local people to bolster their defenses and guard their freedoms. Even at Wake Island, where he stopped 14 June for refueling, there is a small detachment of MATS personnel spending a long, weary tour in order that they may administer to the well being and safety of the thousands of passengers who stop at the isolated atoll each month.

Unlike the NATO area so familiar to the President, in the Far East our uniformed representatives work under a different set of rules in each nation. In each the problems are different and the solutions vary, but in all the threat is the same—Red China.

The President will find a highly dedicated corps of men, working arduously with the local people and their governments and practicing a true "People to People" program. He will find, too, that their living conditions are not all plush and luxury as so often charged. The wives and families, too, share their hardships and work with them to improve the relations with the local peoples, doing much good work with the orphanages and the poor and unfortunate.

The tour offers the prospect of impressing upon the Commander-in-Chief the importance of our military power in the Far East and the dangers that would be involved in any cut-backs in strength.

Journal's Reporting Stirs Action In Congress

THE JOURNAL is proud to have played a part in bringing to the attention of Congress the manner in which funds appropriated for the Army have been withheld and thus to have stirred the legislators to further action in support of the modernization of our ground forces.

When Maj. Gen. David W. Traub, Director of Army Budget, was before the Senate Appropriations Committee, Chairman Dennis Chavez (D-N. Mex.) asked him:

"On page 1 of the ARMY NAVY AIR FORCE JOURNAL of 13 February, 1960, there is an article which refers to testimony before the House. The article is entitled 'Brucker tells how Pentagon sidetracked \$4,500 million in Army funds since the end of the Korean war.' . . . The Committee would like to know if these statements as quoted are accurate. What do you know about this?"

General Traub replied that he was "prepared to answer this question" and proceeded to verify THE JOURNAL's story by relating how an intricate system of bookkeeping had deprived the Army of the funds appropriated by Congress.

General Traub also reported that the fiscal procedures that caused the deficiency in new obligational authority have since been rescinded by higher authority "which pleases the Army very much."

THE JOURNAL is happy that its analytical reporting of such significant developments is serving good ends.

Military Men Of Integrity

In the course of his testimony before the Senate Subcommittee on Federal policy-making, Defense Secretary Thomas S. Gates, jr., defended the existing set-up of the Department of Defense and the Joint Chiefs of Staff. Some concern has been expressed because, in his words, "on some important matters the chiefs do not reach unanimous agreement and thus—it is suggested—do not give the Secretary of Defense clear, firm, unanimous recommendations."

Mr. Gates said that he views such disagreement as helpful in bringing out important issues.

"Senior military men of integrity do not compromise their views when they think our national security is at stake," was his cogent comment on this situation.

This comment was typical of Mr. Gates whose long background of Pentagon experience has given him a deep understanding and appreciation not only of the defense organization and its operation and needs, but also of the corps of senior officers who have dedicated their lives and careers to the safety and well being of the Nation.

READERS' VIEWS

M/G States Pay Views

I read with the same interest as thousands of other retired officers, the comments contained in your June 11th issue concerning the probable future consideration of the pay equalization bill. Senator Stennis is quite properly having a study made of the facts before making a decision. My doubts as to favorable final action stem from ignorance of what information has been furnished the Senator.

It is my suggestion that THE JOURNAL furnish the pay committee concisely documented facts as to how the present pay system discriminates against those who held the key positions of responsibility during World War II and Korea. This has probably been done in one fashion or another but I haven't seen comparisons that dramatize the differences in pay as should be done. If the Defense Department had presented both sides of the story when the original pay bill was being considered there is no doubt in my mind that proper corrections would have been made at that time.

Some of my doubts run like this. Did General Maxwell Taylor explain that under the pay bill he recommended that:

He would draw substantially more money than his predecessors as Chief of Staff—Ridgway, Collins, etc.

He would draw more than officers who commanded Armies and Groups of Armies—Devers, Van Fleet, Clark,

Simpson, etc.

Did G-1 of the Army explain that when he retired he would draw a couple of thousand dollars more per year than the Lieutenant Generals who commanded Army Corps' in combat—Geoffrey Keyes, Crittendenberger, etc.

And was the Senate committee advised at that time that the great majority of those who would draw the higher retired pay would be men who had never exercised combat command or risked their lives for their country?

I am certain that a carefully prepared document setting forth specific injustices would carry a great deal of weight. For example, a Colonel, ANTONIO COLONEL, retired under the new pay bill will draw almost exactly as much pay as Brig. Gen. Arthur Champeny who won a DSC in World War I, World War II, and in Korea, plus five Purple Hearts for wounds in combat.

As a personal example there are officers who served under me in combat—below the grade and responsibilities of General Officer—who have already retired with more pay than I receive. This in spite of the fact that I served some 10 years longer on active duty than they did.

THE JOURNAL has done a good job in keeping this matter before the public. Your efforts are greatly appreciated.

JAMES C. FRY
MAJOR GENERAL, USA-RET.
617 JUNIPER LANE, RAVENWOOD
FALLS CHURCH, VA.

General Bradley Scores Insufficient Combat Forces; Aeroplane Bomb Utility Doubted; L/G Grant Mystery

10 Years Ago—In testimony before the Senate Appropriations Committee, General Omar N. Bradley, Chairman of the Joint Chiefs of Staff, declared that our Army, Navy and Air Force are not sufficient now to fight a major war, and will not be adequate for such a calamity by the end of the next fiscal year.

50 Years Ago—Maj. Gen. Franklin Bell, U.S.A., gives the opinion that the development of heavier-than-air machines will probably come as rapidly as that of the motor car, and that within ten years at the most the aeroplane will be brought to a remarkably high state of efficiency, particularly as a military machine. General Bell rather doubts the utility of the aeroplane for explosive dropping purposes.

96 Years Ago—It must be amusing to the personal friends of General Grant and to his companions of the mess, to read the stories which newspapers are telling as indications of his character. To those who are privileged to know him as the genial, generous, candid friend, who, if he has secrets, hides them under the pleasant guise of entire freedom of conversation, it can but be surprising to hear that the Lieutenant-General clothes himself in mystery, and admits no partners of his thoughts.

B-47's WILL USE CIVILIAN AIRPORTS

THE dispersal program being pushed by SAC will see six-jet B-47's operating from civilian airports in the United States.

The bombers will be deployed from their regular bases to other airfields for short periods. This will make it impossible for an enemy to forecast the location of SAC's medium bomber force.

During the past several years, SAC has been adding bases for dispersal of B-52 heavy bombers and KC-135 tanker aircraft.

The Pentagon said that "dispersal of the B-47 force would go hand-in-hand with an airborne alert capability of SAC's Boeing B-52 force when such is required."

CAPITOL JOURNAL:

Senate "Turkey Shoot" Will Be Necessary To Prevent Death Of Many Military Bills

A "TURKEY shoot," affecting dozens of military bills, can be expected at the Capitol any day now. With a scant three weeks to go before Congress must adjourn for the nominating conventions, only six military bills have been signed by the President this year. The fault is not the President's. There have been few bills to sign.

The Senate Armed Services Committee has taken no action this session on numerous measures involving members of the Services and their families. Many of the bills which are before the Senate group are House-passed measures, some dating back to February 1959. If not acted upon by the Senate during the current session, all will die and the House will have to do all of its work over again next year.

There is a good chance, however, that a "turkey shoot" is just in the offing. This phrase is used on Capitol Hill to describe action in which a Committee takes up practically every bill on its calendar and approves or rejects the measures with the rapidity of spent shells being ejected from an automatic rifle. The Senate Committee has used this device in the past, and there is some reason to believe that it will be resorted to again this year.

Pending before the Committee are several major bills in which the Services have a keen interest. These include the "White Charger" bill, the retired pay measure, the Hébert officer employment bill, the ROPA amendments measure and the term-contract plan for Reservists, to mention only a few. "White Charger" was approved by the Senate last July, was amended by the House Armed Services Committee this year and approved by the House in March. It is now subject either to Senate Armed Services Committee approval, as is, or it must go to conference before final action can be taken. The Hébert, ROPA, retired pay and term-contract measures all have passed the House, but Senate hearings have been held only on ROPA and the Hébert bill. There was a possibility, as THE JOURNAL went to press, that the ROPA amendments might win the Committee's approval this week, but no further action has been announced on the Hébert measure, and no action has been taken at all (nor is any now scheduled) on the other major measures or the scores of other bills awaiting Senate action.

The submarine incentive pay bill, affecting Polaris crews, is one of the House-passed measures which the Defense Department still hopes will be approved this session. Other House-approved measures which the Pentagon wants to see passed include bills to establish two new Air Force medals, set a peacetime limitation on Marine Corps lieutenant generals, establish increased compensation for the Academic Dean of the Naval Postgraduate School, revise requirements for physical examination of Reservists, authorize continued ROTC flight instruction, improve allowances for travel and transportation, establish medals for service in the Antarctic, and authorize permanent Regular Army appointments for two active duty Reserve general officers.

Also before the Congress is an emergency measure involving the Navy-Marine Corps "Hump" Act, approved last year. The Act, as reported in THE JOURNAL, 11 June, has developed a flaw which will bar the Navy from

forcing the retirement of large numbers of non-Academy officers unless Congress rewrites one of the sections of the law. The House Armed Services Committee approved new language for the bill last week, and the measure is now pending before the House where it is expected to receive swift passage. When it reaches the Senate, the bill will be added to the Senate Armed Services Committee's already-overloaded calendar, unless the "turkey shoot" takes place before the House acts.

At the same time that it approved the "hump" action, the House Armed Services Committee also reported a number of other new bills, including a measure to authorize additional appointments to West Point and the U. S. Air Force Academy. All, except the "hump" measure, which probably will be squeezed through because of its emergency nature, face an uncertain reception in the Senate. They, too, however, could be rushed through to final action by means of a "turkey shoot."

The new bills approved by the House Armed Services Committee will increase the pay of certain permanent professors at the Military and Air Force Academies, impose new limitations on the transportation of household effects by air, amend the Armed Services Procurement Act, and bar enlistment of aliens in the Regular Army and Air Force unless they are, or have made a legal declaration of their intention to become, citizens of the U. S. Another measure provides a method for regulating and fixing the wage rates for employees of the Portsmouth, N. H. Naval Shipyard. And, another bill approved by the Committee will authorize a small number of retired commissioned warrant officers who were advanced on the retired list to their highest WWI grade under the Act of 21 June 1930 to receive retired pay based on the grade in which they retired instead of the grade to which they were advanced. None of the measures had been voted on by the House as THE JOURNAL went to press.

During House debate on the Hébert bill, back in April, THE JOURNAL reported how Representative H. R. Gross (R-Iowa) asked and obtained permission to "speak out of order" about a U. S. research grant to the Israel Institute of Applied Social Research, Jerusalem, to test the "husband and wife relationship." Congressman Gross, who is constantly digging such items out of appropriations bills, told how the \$33,000 grant was to be used to "develop a diagnostic pictorial test of both intrapersonal and interpersonal aspects of the role of relationship of husband and wife." His laughter-provoking action helped to ease the tense atmosphere which had built up in the debate on the Hébert measure. The U. S. is not the only place where such minutiae occupies the time of top lawmakers, however. Recently in the British House of Commons, immediately preceding debate on the collapsed Summit conference, a Member of Parliament inquired about research undertaken by the Minister of Agriculture, Fisheries and Food into the language of cod, while mating. The Minister admitted that such studies are, indeed, underway, although they do not necessarily involve cod language only in the mating season. He even attempted to translate the cod language as recorded by scientific instruments. Sounds something like "Grr-umph," he said.

Airlift Controversy Reviewed

CONGRESS is putting the finishing touches on the first significant action it has ever taken to provide and maintain an adequate strategic military airlift.

Following the close of WW II, the Military Air Transport Service evolved from the Military Air Transport Command, which had performed outstanding wartime service. In the ensuing years, MATS has been given an increasingly important part in military planning until today it is one of the key elements in the general war plans approved by the Joint Chiefs of Staff.

In spite of this increasingly important military role, MATS has been subjected to continuing pressures from the civil airlines which have hoped for a greater share of military air traffic. At the same time there has been division within the Air Staff as to the proper role and level of activity of MATS. In another area, the top command of the Army, both civil and military, has been futilely contending that its airlift requirements have been almost totally neglected. This Army protest was predicated upon its knowledge that the initial commitment of strategic military airlift in support of general war plans approved by the JCS left the Army almost totally excluded.

Rivers Group Launches Study

In the midst of all these controversies, the Rivers House Armed Services Subcommittee began an investigation into the adequacy or inadequacy of the national military airlift. Before the hear-

ings were less than two weeks old, the Subcommittee uncovered the fact that the aging MATS fleet had reached the stage where immediate interim modernization, through the procurement of "off-the-shelf" aircraft, was mandatory in order to avoid an unacceptable military risk within the next four or five years.

On the basis of this conclusion, Subcommittee Chairman L. Mendel Rivers (D-SC) appeared before the House Military Appropriations Subcommittee in late March to strongly support the appropriation of \$50 million to begin the development of a new uncompromised, turbine-powered aircraft and to urge immediate procurement of 100 "off-the-shelf" aircraft for interim modernization.

\$385 Million Proposal

The 100 aircraft proposed by Chairman Rivers were to be divided 50-50 between C-135's, or equivalent type, and C-130-E's.

The latter type airplane is particularly attractive to the Army because it has both a troop drop and a cargo drop capability, can fly nonstop across the Atlantic with a meaningful payload of troops or cargo, and is equally useful as a tactical assault aircraft.

The total procurement cost of these planes was estimated at approximately \$335 million, which, together with the Administration-approved \$50 million to begin development of a new cargo aircraft, totalled approximately \$385 million as the recommendation of the Rivers Subcommittee.

In recent years, when the question of

interim modernization of MATS has been considered by House and Senate Appropriations Committees, the Committees have evidenced concern that any jet aircraft procured for MATS would find their way ultimately into so-called "junketing expeditions," rather than being assigned to purely military missions. This feeling, fully supported by various elements of civil aviation, has resulted in the procurement of no jet aircraft.

At present, the only modern aircraft in the entire MATS fleet are the C-133 turboprops. Approximately 32 of these planes are now available, and 18 more have been purchased and are in production. All

of the C-133 aircraft, however, must be devoted to the air movement of "out-size" cargo items for which no other aircraft are available in either the military or civil air fleets.

Following the well documented recommendations of the Rivers Subcommittee, the House Military Appropriations group continued, nevertheless, to be somewhat fearful about the procurement of jets for MATS. Although the Rivers Subcommittee had recommended the procurement of 50 jets and 50 turbo-props, requiring \$334 million in new obligation authority, the Appropriations Committee approved only \$250 million in ex-

MEMO--

THE SERVICES WILL BE ASTONISHED to learn (see Page 5) that thousands of career military men—many of them with decorations for combat service—face loss of retirement pay because it has been ruled that they come under the Hiss Act. Unless Congress remedies this deplorable situation immediately, there will be a drastic impact on military morale. The facts, just brought to light, show that the Act is being administered against military men in a manner in which Congress never intended. Cited is the case of an enlisted man who will lose \$33,000 in retirement pay for a summary court-martial conviction in which he drove a government vehicle .8 of a mile off a scheduled route.

A COMPTROLLER GENERAL'S RULING has tied the hands of the Pentagon, which is seeking remedial legislation as a top-priority matter. General Counsel J. Vincent Burke, jr., has declared that the present interpretation of the Hiss Act, from which the Pentagon has no out, is a "gross injustice."

MILITARY MEN IN WASHINGTON, who are under orders to new assignments, report some difficulties in selling their homes. Several Pentagon officers told The Journal that they have been forced to take substantial losses. A major cause for the problem is said to be uncertainty of many prospective buyers, pending the outcome of the November elections.

DESPITE THE CHANGES IN STATE LAWS which now permit Servicemen to vote by absentee ballot in all States for the first time since 1944 (see page 16), only 19 States have complied fully with the recommendations of the Federal Voting Program. It aims at eliminating all major obstacles to voting by Armed Forces personnel and their families, including abolition of the poll tax, establishment of absentee voting registration in all States, and provision for absentee primary voting in all States.

TOP-ECHELON AUSTERITY marks the 1960 Secretaries Conference being held this weekend at the Marine Corps Schools, Quantico, Va. Fiscal support for the sessions has been cut. One effect: in past years, the high-ranking civilian and military leaders have been entertained with a show. This year they will see a movie. The 1960 Conference could be the last. There is talk at the Pentagon of abandoning the Quantico meetings.

LT. GEN. ARTHUR G. TRUDEAU, the Army's Research Chief, seeks every possible opportunity to discuss with scientists R&D progress and problems. He has spoken to scores of groups throughout the Nation. On 14 June, he addressed the International Conference On Partial Differential Equations and Continuum Mechanics at the Army's Mathematics Research Center at the University of Wisconsin. He told the mathematicians that "the world is nobody's plum. It's a wrinkled old prune," said General Trudeau with typical forcefulness, "and will only be a charred pit unless wise and able leadership prevails and unless the peoples of the Free World stop measuring our way of life by the false gauges of material wealth and luxuries."

SERVICE PERSONNEL ARE BEING WARNED of recent incidents involving abuse of privileges overseas. Cases are reported involving "large scale smuggling of narcotics, diamonds and watches from one country to another, particularly out of Hong Kong." The Pentagon also has alerted commanders to advise personnel concerning foreign exchange laws.

SQUADRON LEADER JOHN A. G. SLESSOR, RAF, son of Sir John and Lady Slessor, has joined the U. S. Air Force Academy's Department of Military Studies as an Exchange Officer. He will lecture on aerial warfare tactics of forces in Europe. Sir John, former Marshal of the RAF, was a guest lecturer last year at Colorado Springs.

ADMIRAL ARLEIGH BURKE has ordered the Navy Bureau of Personnel to consider elimination of the officers' summer dress Khaki uniform for officers and CPO's and its replacement with a dress blue counterpart to be worn ashore and afloat. The new blue garb will not replace working khakis. A message has been sent by BuPers to all commands, asking for comments on the proposed change. It is expected that the new uniform will be identical with the heavy winter dress blue uniform, with the exception that it would be made of a lightweight material.

SENATOR HENRY M. JACKSON (D-Wash.), who has been concerned with maximum utilization of the Nation's scientific resources, has praised the efforts being made by Lt. Gen. Bernard A. Schriever in ARDC through the new "Accent On People" program (see Page 1.) General Thomas S. Power of SAC and General Schriever of ARDC command more attention on Capitol Hill in the matter of military manpower problems than any other major commanders in any of the Fighting Forces.

GENERAL SCHRIEVER, in an effort to keep as close contact as possible with members of his command, in the next months will attend "Dining In" sessions at ARDC installations throughout the Nation. These traditional get-togethers of military men are winning new prominence in the services.

THE TECHNICAL-MANAGEMENT PAY concept, which is under study by the ARDC Personnel Review Committee, is certain to attract keen interest in all the Services. In the Air Force, many commanders are concerned over the lack of adequate applications for advanced training at colleges and universities under sponsorship of the USAF Institute of Technology. One major reason for this is the fear of some qualified officers that participation in this academic program could threaten their proficiency flying status.

THERE IS NO QUESTION that legislative action authorizing Technical-Management Pay in the Armed Forces would be a great incentive to attainment of graduate degrees. This is, of course, a highly complicated problem, and will require much study before a definitive legislative proposal can be developed.

A FORMER ARMY INFORMATION CHIEF, Lt. Gen. Harry P. Storke, who has been CG of I Corps in Korea, will replace Lt. Gen. Paul D. Harkins as Commander of the U. S. Army Element of Allied Land Forces Southeastern Europe in Izmir, Turkey. General Harkins will become Deputy CinC and CofS of U. S. Army Pacific in Hawaii in September. General I. D. White, USARPAC CinC, is slated for retirement next year. Maj. Gen. John L. Ryan, jr., Pacific Command, Hawaii, will be assigned next month to I Corps.

THE NAVY IS STILL HOLDING OUT in granting a request by Chairman Carl Vinson (D-Ga) of the House Armed Services Committee that it submit the case of Cdr. Edward White Rawlins, USN-Ret., to the Board for Correction of Naval Records. The Journal revealed last week that Chairman Vinson, who had written the Navy on 21 April, had yet to receive a reply. The unusual delay in responding to a communication from the powerful legislator could be a tip-off to the fact that the Navy is wary of the Rawlins case.

WHEN THE COMMANDER LAUNCHED HIS FIGHT, more than 10 years ago, there was a companion plea by another Commander whose case did get to the Correction Board. The Board ruled in the other officer's favor. The Navy, however, shuttled the report aside and has never acted on it. Following this initial unhappy experience, the Navy has never permitted Commander Rawlins' case to be heard by the Board, and, obviously, is now trying to hold out even against Chairman Vinson whose wish is usually the Navy's command.

THE RESERVE OFFICERS ASSOCIATION, 70,000 strong, will adopt a resolution at its convention in New York City 29 June-2 July opposing any plan to cut the strength of the Reserve Forces. The JCS recently completed a military assessment of Reserve Forces requirements, and turned its analysis over to Assistant Secretary of Defense Charles C. Finucane for further study. President Eisenhower in January asked Secretary of Defense Gates for a new look at the Reserve Forces structure.

AN AIR FORCE CHIEF MASTER SERGEANT with a Master of Education Degree will represent the Air Training Command at the annual Air Force Association convention in San Francisco 21-25 September. He is CM/Sgt. Robert E. Holbert of the Sheppard AFB, Tex., Technical Training Center, who received his graduate degree this month from Midwestern University. He entered the Air Force directly from high school in 1940. A daughter, Jacquelyn, is an Education major at the Pacific University in Oregon.

CDR. JAMES CALVERT, USN, who commanded the nuclear submarine Skate on her historic voyages to the North Pole in 1958 and 1959, is the author of "Surface At The Pole," to be published 1 August by McGraw-Hill Book Company, New York City. Capt. Edward L. Beach, USN, former Naval Aide to the President, himself an author ("Submarine" and "Run Silent, Run Deep"), who commanded the nuclear submarine Triton on the historic globe-circling undersea voyage completed last month, says that Commander Calvert's book "should become a classic of polar exploration."

A FORMER B-47 INSTRUCTOR, Capt. Russell H. Miller, has transferred from the Air Force to the Marines, in which he served as a radio gunner staff sergeant in WWII. The first Regular AF officer to shift to the Marines under the current inter-Service transfer program, he has been assigned to the MCAAS, Beaufort, S. C.

THREE-STAR DEFERENCE WAS SHOWN by Army Surgeon General, Lt. Gen. Leonard D. Heaton, as he and other military officers waited to board Eastern Airlines flights at Washington's National Airport for the American Medical Association Convention in Miami. Many of the flights, including General Heaton's were delayed or cancelled because of the pilots' strike. Deciding to delay his departure until the following day, General Heaton on 11 June gave his seat to Capt. Stephen P. Dittman, MSC. General Heaton explained to the Captain: "It's more important that you get there first because you have an exhibit to set up."

NEW SUPPORT FOR "STRONG" MEDICAL RESEARCH PROGRAMS is voiced by the Senate Appropriations Committee in its report on the fiscal '61 military budget. The Committee recommends that the Defense Department develop and maintain "strong programs in support of medical research, not only to be applied to the Department's immediate and specific needs, but to take advantage of special opportunities to make contributions of particular value to the total medical research effort of the country."

A COMMITTEE OF CONSULTANTS who studied the entire Federal medical research program for the Appropriations Committee had charged that although the Armed Forces "represent an important resource for medical research" that, primarily because of lack of funds and personnel, the resource was "being poorly utilized."

DR. HERBERT F. YORK, Defense Director of Research and Engineering, is known to be in favor of an expanded medical research program. He has recommended to Secretary of Defense Gates that funds for this purpose be increased in the FY '62 budget, now in preliminary preparation.

OFFICERS RETIRING OR SEPARATING FROM THE SERVICE

If you are retiring or separating from military service or have already left and are considering seeking a position in civil life, we may well be of real assistance to you in effecting your transition to the right job and career.

As career counselors, we have helped many officers whose background had been largely or wholly in the armed forces, to secure satisfying positions in commerce or industry. In counseling with them, we enabled them to recognize the adaptability of their background and experience to jobs for which they were particularly suited, and which had long range potentials.

We analyzed and pointed out the values and abilities they had to offer, and helped determine the right markets for them. We then developed a program to enable them to secure that position, and directed all their activities until they were established in it.

We invite you to investigate how our services can aid you in your particular circumstances to begin a new career. Our program is designed to enable us to work with those stationed at a distance from New York.

Explanatory Booklet "B" free on request.

Flentge, Monroe C, Ft Benning.
Greer, Billy V, Ft Huachuca.
Scott, Dennis F, Ft Bragg.

Col. Surles Will Get 2d Army Duty

Col. A. D. Surles Jr., Deputy Commander and CofS, U. S. Army, Hawaii, will report to Ft. Meade, Md., in late July to assume the Post of Deputy CofS for Operations, Second Army, effective 1 August.

He succeeds Col. Gilbert J. Check, who recently departed for Hawaii where he will serve with Headquarters, CinC, Pacific.

Colonel Surles, son of the late Maj. Gen. A. D. Surles, is a graduate of Valley Forge Military Academy, Wayne, Pa., '32, and the U. S. Military Academy, '37. He and his wife, Ellen, have two children, Barbara, 19, and Thomas, 17.

2d Lieutenant

L/C Nicholls To Karlsruhe

Lt. Col. A. B. C. Nicholls, Chief of the Watervliet, N. Y., Arsenal National Industrial Division, has been assigned to Karlsruhe, Germany, where he will command the 66th Ordnance Battalion.

Colonel Nicholls is the son of Col. James C. Nicholls, USA-Ret.

A senior parachutist with 37 jumps, Colonel Nicholls and his wife, the former Catherine Dymus of Syracuse, have two sons, Andrew B. C. III, 9, and Gregory,

DETROIT TO RANGOON

Col. John W. Romlein, Detroit Air Defense Commander, leaves this month for special duty in Rangoon, Burma.

New commander of the 28th Artillery Group (AD) will be Col. Charles F. Coffee, who arrives in August.

USMA Cadets Train With Seventh Army

A TOTAL of 215 U.S. Military Academy cadets will begin four-week training assignments with the Seventh Army in Germany on 2 July. Members of the class of '61, they will perform the duties of junior officers in infantry, artillery and armor units.

Seven cadets have been assigned to the Berlin Command for the same period.

Cadets will train in organizations performing extensive field duty during the 231 July period, many of them scheduled for field training for more than 50% of the time.

Cadets will serve as platoon leaders and assistant platoon leaders, and their potential will be evaluated by commanders of company-sized units with which they serve.

Liaison officers from the U.S. Military Academy will accompany the cadets, with one liaison officer assigned to each division headquarters.

The cadets will assemble at Frankfurt in July for a critique of their Seventh Army tour of duty. About 75 will then return to the States for summer leave; the remainder will take leave in Europe before returning to their homes and, subsequently, to West Point for the fall academic term.

L/C Franke Named Map Service Exec

Lt. Col. Edward F. H. Franke has assumed duty as Executive Officer of the Army Map Service, an agency of the Corps of Engineers at Brookmont, Md. Colonel Franke succeeds Lt. Col. S. G. Hash, CE, who becomes Project Engineer in the Department of Graphic Arts and Distribution.

The new Executive Officer formerly was with I Corps in Korea.

Colonel and Mrs. Franke have three children.

Col. Martin Named Deputy

Col. Julian H. Martin has been assigned Deputy Assistant Commandant of the Army Infantry School at Ft. Benning, Ga. He has been director of the Communication Department of the School since 1958.

USMA CADETS SAIL WITH COAST GUARD

SEVEN West Point cadets will join the U.S. Coast Guard Academy Cadet Practice Squadron in Portsmouth, England, for a two month training cruise aboard the Coast Guard Academy's 295-foot, three-masted sailing barque EAGLE this summer.

RADM Stephen H. Evans, Superintendent of the Coast Guard Academy and Commander of the Practice Squadron, said; ports of call for the 1960 Coast Guard Practice Squadron will be Oslo, Norway, Portsmouth, England, and Le Havre, France. The 311-foot Coast Guard Cutters, Yakutat and Absecon will escort the Eagle. A total of 295 Coast Guard cadets of the Academy's first and third classes will make the annual summer training cruise aboard the three ships.

The West Point Cadets will join the Coast Guard Cadets and 13 Naval Academy Midshipmen aboard the Eagle as part of a program of exchange students between the four service Academies for short periods.

Service Sons Appointed To USMA From Ft. Belvoir School

SILVER ANNIVERSARY

Col. Patrick J. Walsh, Post and
Catholic chaplain for Ft. Meade,
Md., celebrated the silver anni-
versary of his ordination as a
priest 12 June with a solemn high
military field Mass.

Present at the Mass was Charles
Walsh, 84 year-old father of Chap-
lain Walsh. He was flown from his
home in Listowel, County Kerry,
Ireland, to be present at his son's
celebration.

The trip was made possible by
Father Walsh's parishioners.

His two sisters, Sisters Julia and
Tarcisus, nuns in the Sisters of
Charity of the Incarnate Word at
St. Joseph's Hospital in Houston
were also present as well as two of
his brothers from Chicago.

Assisting Colonel Walsh at the
Mass was Chaplain (Col.) Harold
Donovan, deacon, Chaplain (Capt.)
Martin J. Osbourne, sub-deacon,
and Chaplain (Maj.) Thomas D.
McGrath and Chaplain (Capt.)
Paul Lynch as master of ceremonies.

Distinguished guests present for
the occasion were Brig. Gen. Wil-
liam J. Moran, Deputy Chief of
Chaplains and Maj. Gen. Patrick
J. Ryan, retired Chief of Chaplains.

Voting Rights Extended

For the first time since 1944, military men will be able to vote this year by ab-
sentee ballot in all the States.

With the exception of persons from Wyoming who are overseas, Service family
members also may vote by absentee ballot in all the States, but the procedures are
different in many cases from those which must be followed by active Service
members.

Wyoming bars absentee voting by Service family members overseas, but permits
such voting for those living in the U.S.

Approximately 2.5 million Servicemen and members of their families who reside
away from their normal voting residence are eligible to vote by absentee ballot in
the 1960 election.

Defense Department officials estimate,
on the basis of past experience, that only
about one million Service people will vote
in November.

Secretary of Defense Gates and other
Defense officials are making a strong ef-
fort to increase the participation of Ser-
vice families in the voting.

They say there is no reason for any
person who wants to vote in the elections
not to do so.

Pentagon officials point out that it is
relatively easy to cast an absentee ballot,
since all States now accept the standard
postcard applications for absentee bal-
lots from active duty personnel. Most
States also permit the use of the same
postcard form by Service family mem-
bers.

Secretary Gates has called for specific
command interest in the voting program
in all Services, and has ordered that ac-
tion be taken to insure that the neces-

sary materials are in the hands of mili-
tary men and their families by 27 Sep-
tember.

But even with this strong push to the
voting program, 1.5 million eligible vot-
ers probably will fail to exercise their
absentee ballots this November.

For a small number of these non-
voters, Defense officials say, some excuse
may be made concerning their failure to
vote.

Many Service family members whose
normal Stateside residence is in Florida,
Louisiana and Alabama will find it dif-
ficult to cast their votes because of the
necessity of registering in person to be
enrolled on the voters' lists.

In Texas, military personnel and their
families must pay a poll tax before they
can vote. Three other States, Alabama,
Arkansas and Virginia, require the wives
of military personnel to pay a poll tax
before they can vote.

ARADCOM DEPUTY WILL END CAREER

Brig. Gen. Willis A. Perry, De-
puty CofS for Plans and Operations
for Army Air Defense Command,
Colorado Springs, retires 30 June.

General and Mrs. Perry, joined
by their daughter, Wilma Helen,
who has just completed her fresh-
man year at Cornell University,
Ithaca, N. Y., will travel in Europe.

A '30 USMA graduate, General
Perry was assigned to the Central
Intelligence Group (now the Cen-
tral Intelligence Agency) from
1946-48, following graduation from
the National War College in 1949
was appointed Intelligence Officer
of U. S. Army, Alaska.

Returning to Washington, D. C.,
he became Deputy Assistant CofS
for Intelligence.

Mrs. Perry is the former Miss
Wilma Laivo of Bandon, Ore.,
whom the general married during
an early assignment in the Hawai-
ian Islands. Mrs. Perry was teach-
ing at the Punahoa School in the
Islands.

The Perrys have two daughters
—Wilma Helen and Mrs. Patricia
Ann Brandes, now living in Ham-
burg, Germany.

All The Services Oppose American Legion Recruiting Proposal

From first page—

Commission will propose legislative action next year.

Any efforts to take recruiting responsibilities away from the Services will be opposed by the Pentagon.

This is the background of the issue: The Security Commission voted 16 to 13 at its January meeting and 8 to 5 at its May meeting recommended adoption of the proposition in principle.

The Commission drafted Resolution 29 which was submitted to the National Executive Committee, the Legion's ruling body between National Conventions. The Executive body then referred the Resolution again to the Security Commission.

The Commission sent out copies of Resolution 29 to all of its Departments for consideration. The NSC intends to take action on the proposal at its 42d

National Convention to be held in Miami Beach, 17-20 October.

Resolution 29, calling for consolidation of all Service recruiting functions under jurisdiction of the Selective Service System, noted that Armed Forces recruiting costs for Fiscal Year 1959 amounted to nearly \$62 million, as contrasted to slightly more than \$29 expended by Selective Service.

The Legion resolution says: "Unification of recruiting for active and Reserve components of the Armed Forces by the Selective Service System would

prove beneficial and economical in that one manpower procurement agency would furnish manpower for the Armed Forces in the same manner as the Civil Service Commission provides manpower for all Government agencies."

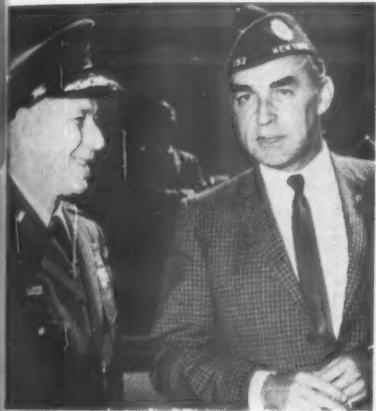

This claim is disputed in the strongest possible terms by Service recruiting experts. They note that the current Draft Law provides only two years of service. They say that unless men are enlisted into the Armed Forces for at least four-year tours, the Government will be required to expend increased

amounts of money for replacements.

The Services say that the Nation benefits from the service of longer term recruits who have pride in their service and sign up for additional tours, often deciding to make the Armed Forces a career.

Assistant Secretary of Defense Charles C. Finucane has declared that "the Department of Defense is deeply opposed to the proposal, and is greatly concerned about the apparent unawareness of the compelling facts which advise against it."

Legion Commander Is Welcomed In Alaska

THE American Legion's National Commander, Martin B. McKneally, was welcomed to Alaskan Command recently at Elmendorf AFB by Lt. Gen. Frank A. Armstrong, jr., USAF, CinC, Alaska.

SAC Seeks Alumni From Six Schools

SAC's Directorate of Information at Offutt AFB, Nebr., is seeking background material on Command personnel who are alumni of certain major universities.

Six schools have been selected for the initial research. Information received from graduates of these universities will be developed into personality-type stories for submission to alumni magazines.

Alumni of Penn State, Ohio State, University of Georgia, University of Texas, University of Colorado and University of Southern California are asked to provide the base information office with the following information, which will be forwarded to SAC:

Name and rank, duty assignment, names of wife and children and ages of children.

University attended, degree received and last year attended, fraternal or club affiliations, college athletic achievements, scholastic honors, names of relatives who attended same school (with last year in school).

Last Bomarc A Sqdn. Graduates Next Month

The last Bomarc A unit will complete training late next month at Hurlburt Field, Fla.

It is the 22d Air Defense Missile Squadron from Langley AFB, Va., commanded by Lt. Col. Robert L. Andrews, with 117 airmen and 12 officers.

The 22d is the fifth Bomarc squadron trained at the Air Defense Missile Training Center.

Col. Legg Will Be I.G.

Col. Richard A. Legg, Vice Commander of the 30th Air Division (SAGE) at Truxton Field, Wisc., will report to Western Air Defense Force at Hamilton AFB, Calif., as Inspector General.

OFF-THE-SHELF SPACE PROBES

NEWEST RYAN CAPABILITY

Instruments shot thousands of miles above the earth by multi-stage rockets hold the key to continued progress in our space research. These probes no longer need be prohibitive in cost.

Using standard off-the-shelf hardware, Aerolab Development Company (a Ryan subsidiary), arranges solid fuel military rockets in various combinations to provide low-cost, high-performance sounding rockets and space probes for the acquisition of scientific data.

Now Aerolab's unique capabilities are added to Ryan's own qualifications for advanced space projects: electronic navigation, automatic guidance, high-altitude recovery systems, missile design, reaction controls, propulsion systems.

For years Ryan has been preparing for the

space era with advanced work in high performance jet target missiles and continuous wave doppler radar systems. Ryan has also solved many high temperature metallurgy problems associated with supersonic flight... new fabrication techniques such as Ryan Wrap and explosive forming, and new design concepts like MiniWate.

At Ryan, the sciences of flight are integrated with the newest fabrication techniques. Unified facilities equip Ryan for many space age projects, from initial design to finished hardware.

A pioneer in aerophysics research since 1946, Aerolab is now a wholly-owned subsidiary of the Ryan Aeronautical Company. Aerolab and Ryan capabilities complement each other, but Aerolab retains its independent operation.

General LeMay's Order Sparks Air Force Marksmanship Drive

(Photo, Page 1)

The United States Air Force, an aerospace force which can fire nuclear-tipped Atlas missiles 9,000 miles and hit the target with pinpoint accuracy, is also teaching its airmen proficiency with small arms.

To find out why, the ARMY NAVY AIR FORCE JOURNAL asked the Chief of Air Force Marksmanship Training about it. Here is his firsthand report:

BY COL. PETER W. AGNELL, USAF

On September 6, 1957, General Curtis E. LeMay, Vice Chief of Staff of the United States Air Force, signed and dispatched this memorandum to the staff of Headquarters, USAF:

"For some time I have been deeply concerned over the relative unimportance that has been placed upon Air Force standards of small arms marksmanship and the maintenance of such standards that have been established. The internal defense of USAF bases and the survival of downed air crew members may be dependent upon individual proficiency with assigned firearms. In addition, all Air Force personnel have defense responsibilities against overt and covert enemy action. To discharge these responsibilities, the fundamental military concept of competency with firearms must be reinstated within the Air Force. The Air Staff will establish an adequate program to achieve a realistic degree of proficiency for Air Police and air crew members and improvement in the marksmanship ability of all Air Force personnel.

"I desire that the Deputy Chief of Staff, Personnel, establish and implement a training program to attain these goals."

A committee of experienced shooters and training officers, headed by veteran pistol shooter, Col. Thomas C. Kelly, two-time winner of the General Twining Trophy awarded to the pistol champion of the Air Force, had been assembled in Air Force Headquarters a week prior to the signing of the memorandum. They were given a comprehensive briefing by General LeMay regarding the requirements for and the standards to be included in a training program and instructed to develop a program which would satisfy these requirements and standards.

The marksmanship training program as approved by the Vice Chief, requires that all Air Force personnel, with limited exceptions, be trained and required to qualify as MARKSMAN. All officers and airmen armed in the performance of duty are required to qualify at SHARP-SHOOTER level. These categories include Air Police and Security Forces, Combat Crew Members and Office of Special Investigation Agents.

The plan stipulated that a USAF Small Arms Marksmanship School be established at Lackland Air Force Base, Texas with Col. Thomas C. Kelly in command. Because I had been associated with Air Force, national and international shooting for a good many years, I was selected

to administer the program at Air Force Headquarters.

The mission of Lackland Air Force Base dictated its selection as the site of the Air Force Marksmanship Training School. Lackland is the reception center for persons entering the Air Force from civilian status. Over 100,000 newcomers receive their basic training at the base each year. The Air Force's Basic and Advanced Air Police Schools, Officer Candidate School, Officer Training School and the Pilot Pre-Flight School are also

located at Lackland. Graduates of the Air Force Academy, the other principal source of personnel entering the Air Force, are required to qualify and annually demonstrate shooting proficiency while attending the Academy.

It was apparent that if Lackland Air Force Base were properly equipped and staffed, it could provide elementary marksmanship training for the majority of newcomers to the Air Force. Our initial effort in the development of Lackland's marksmanship training capability

was to establish and operate a Marksmanship Instructor Course of training. We carefully selected dedicated shooters of known ability. These sharpshooting officers and airmen were transferred to Lackland and through the cooperation of other Services, attended Marksmanship Instructor Courses conducted by the Army and Marine Corps. The graduates of these courses consolidated the techniques and procedures learned at these schools into comprehensive lesson plans and courses of instruction. Training

SOLID STATE RADAR MODULATOR

One of a family of modulators designed, developed and produced by Temco for missile, aircraft and ground equipment installation, both military and commercial. Full use of solid state switching techniques provides high reliability, small size and less than 50 millimicroseconds pulse jitter.

DC TO DC POWER CONVERTER

Designed specifically for telemetry systems, Temco's DC to DC converter is based on a unique method of non-dissipative voltage regulation. This one small unit (3.5" x 5.9" x 2.2"—weight 3 pounds) provides a 250, 150 and 5 volt DC power supply. High efficiency . . . 70% at full load . . . is combined with extremely accurate voltage regulation.

Temco Electronics has designed and developed a family of spiral antennas which cover the frequency spectrum from 30 to 2000 mc. These antennas are contour shaped for flush mounting and can be supplied with a single or double curvature to match skin contours. The uniform response over a wide frequency band, both in impedance and radiation patterns, makes the spiral an extremely versatile element for either transmitting or receiving application.

SPIRAL ANTENNAS

SHARP DETECTION

Col. Thomas A. Kelly, Commander of the Air Force Marksmanship School, has won acclaim in scientific circles for his discovery of artifacts from an Indian culture which may be 6,000 years old.

While on a hunting trip with members of his family, Colonel Kelly happened upon an excavation site in hill country southwest of Austin, Tex. Helped by University of Texas students, he has unearthed 500 pounds of flint dart points and other artifacts.

Much of the material is stored in his quarters at Lackland for detailed analysis. He plans to publish a report on the project.

spaces, training aids, supplies, equipment and acquired know-how were quickly developed and a course of training for marksmanship instructors was soon announced throughout the Air Force.

We didn't waste any time. Even while we were developing the courses of training to produce marksmanship instructors, we began working on the requirement for ranges at Lackland. The range complex will have a 100-target, 25 and 50 yard pistol range, with electrically operated, timed, turning targets. The covered firing point range, built in a congested military and civilian area is constructed with "safety baffles" erected at right angles and above the line of fire. They are designed to stop any pistol

bullet which would normally go over the earthen backstop. The modern range complex includes a 240 carbine/small-bore rifle range with 50 and 100 yard targets that are convertible to 50 and 100 meters for international courses of fire. A 50 position, covered and protected international slow-fire pistol range, convertible into a practical pistol course, is now being built. The complex will also have a 25-meter, five-bank rapid fire pistol range with timed, turning, silhouette targets. On the Leon Springs Reservation, west of Lackland, a 1,000 yard known-distance high power rifle range and a 300 meter international range are now nearing completion. Installations throughout the Air Force are now con-

structing new ranges and rehabilitating existing ranges. Much of this improvement and construction is on a "do-it-yourself" basis, by dedicated instructors and shooters and they're doing a fine job of it.

The Air Force has assembled all the best qualified gunsmiths in the Air Force. These highly skilled technicians train and supervise other interested airmen to accurize and maintain the weapons and equipment of the instructors of the School. The Air Force will, centrally maintain all its match and target grade competitive weapons at Lackland. This unique depot weapons maintenance system at the School is necessary because of the critical shortage of qualified gun-

smiths in the Air Force.

We developed special lists of equipment and supplies for Air Force installations covering the weapons and equipment necessary for standard training. The lists also include a limited amount of specialized match and target grade weapons, both military and commercial, to be used in support of the competitive phases of marksmanship training.

We consider competition a very important part of the Air Force Training Program. It provides a necessary incentive to devote the arduous hours of training that you must have to excel in shooting. "We can equip our people to shoot, we can train our people to shoot, we can even order our people to shoot. But, unless they want to shoot accurately, they will never excel." This is Colonel Kelly's simple explanation of the incentive, competitive phase of our training program. Keen competition, under controlled conditions, provides commanders and training officers with a valid method of evaluating the ability of assigned marksmanship instructors and checking the status of their training program. The Small Arms Firing Schools conducted in connection with the competitions help transmit new techniques and methods of training.

To add further incentive, the Air Force created and authorized for wear on the uniform, its own Excellence-in-Competition and Distinguished Rifleman and Pistol Shot Badges. With the exception of aviation badges, these were the first to be authorized for wear on the uniforms. This authority broke the long established Air Force "badge barrier."

The 1958 National Championship Rifle and Pistol Matches at Camp Perry, Ohio provided the Air Force with its first opportunity to evaluate the newly implemented marksmanship training program. Match experience is a commodity which money can't buy. With only a few local and regional matches under their belts, shooters were selected at the first All-Air Force Rifle and Pistol Matches for a short period of training to represent the Air Force at the National Matches at Camp Perry. Our shooters acquitted themselves very well. The "Blue" Pistol Team won the Center Fire National Match Championship with a new match record score, and took second place in the .45 Caliber pistol team match. Our smallbore rifle team won three individual and one team match championship. An Air Force man won the important Marine Corps Cup Match in competition against 1,814 of the nation's finest military and civilian shooters. We also won many class championships and finished much higher than had been hoped.

At Camp Perry, in 1959, Air Force shooters competing against 229 teams, won the .22 Caliber Pistol National Team Championship. An Air Force Guardsman garnered the National Guard Trophy competing against the best shooters of the other services. The results of the 1960 National Matches, to be conducted in July and August, will indicate the progress in our training program.

In 1958, the year the Air Force Marksmanship Training Program got underway, Technical Sergeant William H. Mellon, an instructor at the USAF Marksmanship School, became the first Air Force pistol shooter to score 2600 points in pistol competition in a 2700 point aggregate match. Since then, ten other Air Force shooters have shot their way into the now "2600 Club," the exclusive organization of USA high score pistol shooters. There are now only about 80 shooters in the country who have performed this feat under the conditions prescribed.

The regulations covering training, qualification requirements, courses of fire, competition, supplies, equipment, ammunition, weapons maintenance and awards have now been published and distributed. Our range plans for pistol, carbine/smallbore and highpower rifle have been revised, published and distributed.

Since the revitalization of the Air Force Small Arms Marksmanship Training, substantial progress is apparent in
—Continued on next page

TEMCO PERFORMANCE PROOF OF ELECTRONICS CAPABILITIES

■ Temco Electronics is experienced in all phases of systems and component research, development, manufacture and marketing . . for both defense and for industry. But the ultimate judge of capabilities is performance. Temco Electronics has solid proof of performance in the products it has perfected. ■ Some of its notable achievements include the stabilization and control system for the Navy's Corvus air-to-surface missile . . XKDT-1 "Teal" rocket-powered target drone developed and produced for the U. S. Navy . . the READ system of radar echo augmentation for use in drones, missiles and aircraft to enlarge images . . Alpha, airborne transmitting and receiving system which permits simultaneous real-time viewing and video recording of visual TV information during flight . . sophisticated radar systems such as the video correlator . . and a broadband VHF distributed amplifier that fills the 500 to 925 mc gap. ■ Through this proof of performance, Temco Electronics is gaining increasing recognition as a leader in the electronics field. But its capabilities and responsibilities go well beyond "delivering the goods." From development to marketing, Temco stays vitally interested in reducing costs, improving design, speeding deliveries and assuring satisfactory performance after delivery. These Temco plus factors are widely known and appreciated throughout the industry. ■ Send for a copy of our new brochure "This Is Temco Electronics," the story of the coming leader in the electronics field.

Admiral Irvin Will Direct Joint Communications

From first page—

operational control and full supervision of the system will be accomplished on a phased basis during the next nine months to avoid disruption of essential communications.

The Defense Communications System will furnish facilities for command and control functions, intelligence, weather, logistics, and administration.

It will control all worldwide, long-haul Government-owned and leased, point-to-point circuits, terminals, control facilities and tributaries required to provide communications from:

1. The President to and between the Secretary of Defense, JCS and other government agencies.

2. The Secretary of Defense and the JCS to and between the Military Departments and the unified and specified commands.

3. The Departments to and between their major commanders and subordinate fixed headquarters.

4. Unified and specified commands to and between their component and subordinate commands.

Admiral Irvin's service has included duty as Deputy Director for Communi-

cations-Electronics, JCS Joint Staff from November 1957 to September 1958.

The Pentagon said establishment of the Defense Communications System and the Defense Communications Agency "is designed to provide: maximum communications for the dollar investment; support for the more advanced weapons systems of the future; maximum flexibility; adequate dispersion with alternate routing capability; standardization of installation, operation and maintenance, and to eliminate duplication of research and development."

Location of the Agency headquarters

NAVY HYDROGRAPHER

RAdm. Edward C. Stephan, South Atlantic Force Commander, has been named Navy Hydrographer, succeeding Capt. Henry G. Munson. Captain Munson becomes a member of the Board of Inspection and Survey, Washington, D. C.

and its staffing have not been determined as yet. The Chief of the Agency and the JCS will recommend an organizational structure and a headquarters location to the Secretary of Defense for his approval.

Col. Blencoe Will Head Signal System

Col. G. M. Blencoe, Seventh Army Deputy Signal Officer, has left Germany for assignment as Chief of the Inner Agency Communications System in the office of the Army Chief Signal Officer.

Colonel Blencoe arrived at Seventh Army Headquarters 1 April 1959 after having served 22 months in Verona, Italy, as Southern European Task Force Signal Officer. He had previously served in the Pentagon as Deputy Chief of the International Policy Priming Board in the office of the Deputy Chief of Staff for Operations.

Returning with him to the U.S. are his wife and two children, James, 15, and Linda Sue, 10.

Air Force Targets Marksmen Goals

From preceding page—

all areas. In base, major command, the All-Air Force and the National Matches. Air Force shooters are scoring higher and higher and more and more airmen are qualifying. The number of National Rifle Association Master Shooters has increased from 39 to 307.

We still have a long way to go before all our Air Force personnel are trained, but we are making excellent progress en route. Although, our base, major command and Air Force competitive teams have improved considerably, they can't yet be compared with the shooting ability in depth of some of the other military services. While striving to improve our relative position in matches in which the standard American courses are fired, the Air Force is also implementing on a small scale, a training program in international courses of fire. Eventually, we hope to place Air Force competitors on the teams representing the United States in Pan-American, Olympic and International Shooting Union's World Championship Matches. The Soviet Bloc nations have dominated international shooting for the past several years and effectively capitalized on this superiority in world-wide propaganda.

The wide dispersion of our Air Force installations, the ever-increasing number of small, isolated missile, communications, navigation and early-warning sites are the reasons why it is so important for all Air Force personnel to be proficient with side arms and shoulder weapons. When considering the intercontinental missile and bomber bases, offensive, defensive and transport aircraft bases, along with other installations committed to combat readiness and support, each one can be categorized as a prime target for sabotage and destruction. The protection of Air Force personnel, survival of our air crew members, the security of untold millions of dollars worth of Air Force equipment, and the capability of each Air Force weapon to perform its function in the time of emergency, may well depend upon the marksmanship of Air Force personnel.

How are we meeting this challenge? Throughout the Air Force, assigned personnel are demonstrating an ever increasing ability to accomplish the prescribed objectives of the Small Arms Marksmanship Training Program.

**MOST
ADVANCED

Airlift Controversy Is Reviewed

From page 11—

cess of budget estimates.

The key language which expressed the continuing fear of the Committee about jets was inserted in the Committee report. It reads: "The amounts provided above the budget are intended for the procurement of an additional 50 aircraft of the C-130-B type, but modified to provide for extended range. The balance of the additional funds are to be applied to the procurement of a cargo version of the KC-135 aircraft or an aircraft of similar capability. It is intended that this cargo aircraft be a side-loading type (which will require the least modification, and thus provide the most immediate delivery) as opposed to the development of a swing-tail version."

The Committee further expressed its fears about the use of jet aircraft of the C-135 type by including language in the proposed new appropriation which would preclude the use of these aircraft in passenger service.

House Recognizes Need

Despite these fears, however, and the reduction in the Rivers' request, the action of the House Appropriations Committee was most significant. It recognized the need for immediate modernization of the Nation's military airlift capability and it clothed the \$250 million in protective language in an effort to insure that the funds appropriated would

not be diverted to some other purpose by the Air Force.

The emphasis on the procurement of C-130-E's and the reduction in the sum for the procurement of C-135 type jets, while reflecting the continuing fears about jet procurement for airlift, will not, however, be an immediate major deterrent to the interim modernization program. This is true because the funds made available will procure as many C-135 type jet aircraft as could be procured from production lines anyway within the next year, Congress will have an opportunity to again re-examine the matter before any harm can be done in the procurement of the 100 aircraft recommended by the Rivers Subcommittee.

Senate O.K.'s \$200 Million

The Senate Appropriations Committee has further reduced the interim modernization from the \$250 million approved by the House to \$200 million. Here, too, fears about the assignment of jet aircraft are reflected in the bill approved by the Committee. The Committee provided that the \$200 million "shall be for transport aircraft suitable for the movement of fully equipped troops and combat equipment."

The irony in this language is that no other use ever was intended in the interim modernization program. In the recommended procurement of 50 C-135-type aircraft, the Appropriations Com-

mittee seemed to completely overlook the fact that the 50 jets recommended by the Rivers Subcommittee were to be austere in every respect, with a cargo floor and sideloading cargo door, and designed to haul either cargo or troops in accordance with military requirements.

In addition, the aircraft currently assigned for the post-strike recovery mission of SAC are woefully inadequate, and from all of the hearings and reports which have been made available it is clearly evident that it was the intent of the Rivers Subcommittee that these aircraft be assigned to the post-strike recovery mission of SAC.

Progress Made

Obviously a greater understanding of these facts must be accomplished within the Congress before the results dictated by military requirements will be met. But, in spite of all the controversies which have existed and the misunderstandings which still exist in some degree, it is clear that very substantial progress is being made to modernize the military airlift capability.

Major Powell Is Aide

Maj. Charles E. Powell has assumed duties as aide de camp to Lt. Gen. Edward T. Williams, Fourth Army CG at Ft. Sam Houston, Tex. He succeeds Capt. George A. Pollin, ordered to Korea.

Major Powell and his wife, Nell, have two children, Deanna, 15, and Charles E., jr., 5.

Big Greeters

TWO top "greeters," Charles S. Stevenson (left), Vice President of Hallmark Cards, and Lt. Gen. Lewis B. Hershey, USA-Ret., Director of Selective Service System are shown between sessions of the Sixth National Strategy Seminar held last week at the Army War College, Carlisle Barracks, Pa. They were among 125 civilian and military guests who met with the students of the College to develop an academic formula for a national strategy and a supporting military program.

Army Orders

MEN OF DEGREE

Col. James Hamill, Missileman-Lawyer, Saluted By Fordham; Other Campus Honors

Col. James P. Hamill, Director of the Army Ordnance Ballistic Research Laboratories, Aberdeen Proving Ground, Md., a '40 graduate, was one of 12 Fordham College alumni honored 7 June at the annual Encaenia Ceremonies held on the campus in the Bronx, N. Y.

The ceremonies, which take their name from an annual academic celebration held at Oxford University, England, honor outstanding professional leadership by alumni, and scholastic achievement by members of the present graduating class.

Col. Hamill

Colonel Hamill, 40, did graduate work at Columbia and New York Universities and received his law degree from Georgetown University in 1955, and was admitted to the American Bar Association that same year.

At the age of 27, he was given the mission of initiating the Army's rocket research program at Ft. Bliss, Tex., and was subsequently assigned to the Pentagon and Huntsville Arsenal, Ala., in similar assignments. Before his appointment as Ballistics Research Director at Aberdeen, Colonel Hamill was in charge of the Army's missile testing program at White Sands Missile Range, NM.

In addition to his present post, he is an adjunct professor at the University of Maryland, evening session.

Thiele, Malcolm H, AEWRON 11; to CAR DIV 18.
Wagner, Theodore A, jr, NATESTCEN PAX RIV; to HATRON THREE.

Westmoreland, Arthur E, USS RANDOLPH; to FITRON 103.
Wright, Louise A P, 4ND; to EASTSEA FRON.
Zakarian, Aaron M, USTAIWANPATFOR/FAIRWG ONE; to UTRON SEVEN.

Colonel Hamill was admitted this week to practice before the U. S. Supreme Court.

Lt. Col. Francis X. Kane received a Doctor of Philosophy degree from Georgetown University, during June week ceremonies. He is on duty in the Pentagon as Special Assistant to the Deputy CofS for Development.

Maj. William H. Schempf, for the past three years Director of Music at West Point and Commanding Officer of the U. S. Military Academy Band, received a Doctor of Philosophy degree with major in Music 12 June from the University of Rochester, N. Y. He came to the Academy from Lehigh University, where he had served for 10 years as Director of its Department of Music.

Major and Mrs. Schempf have two children.

DOUBLE MAJOR

A precedent was established at the U. S. Air Force Academy graduation ceremonies when seven cadets were awarded a Bachelor of Science diploma with a double major.

They were Alex D. Zimmerman, Wilfred L. Goodson, Frank D. Mayberry, William W. Taylor III, Stephen R. Holt, William A. Carnegie, and Bruce M. Mosier.

The required curriculum at the Academy consists of 185 credit hours, including 145 academic hours and 40 for airmanship and physical education. In order to be granted a major, a cadet must take an additional 17½ hours with twice that amount required for a double major.

Two of the seven double majors will be in the fields of Basic Sciences and Engineering Sciences, with the other five in Engineering Sciences and Sciences with an Aeronautical option.

Of the 59 cadets graduated with single majors, 17 were in Public Affairs, six in English, three in Humanities, nine in Basic Sciences, 23 in Engineering Sciences and one in Science with an Aeronautical Option.

The cadets were able to achieve the majors through a program at the Air Force Academy called Curriculum Enrichment, which was started in 1957. It enables the gifted students and those with prior college to take extra and accelerated courses during their four years at the Academy.

Proof of the program's effectiveness in encouraging accelerated study is that of the 66 cadets receiving either a single or double major, only 18 had taken college courses prior to coming to the Academy.

RADM. C. W. Schantz, DC, USN, Assistant Chief of the Bureau of Medicine and Surgery and Chief, Dental Division, was awarded the honorary degree of Doctor of Science at the 76th Annual commencement exercise of Marquette University, Milwaukee. He is a graduate of the School of Dentistry at Marquette.

2d Lt. Zimmerman Leads USAFA '60 graduates

THE U. S. Air Force Academy's top graduate of the Class of 1960, 2d Lt. Alex D. Zimmerman of San Diego, is congratulated by Brig. Gen. Robert F. McDermott, Dean of the Faculty, following a ceremony in which his name was placed on the Harmon 100-Year Honor Roll. Lieutenant Zimmerman will enter pilot training at Bartow AB, Fla.

Last week's issue of THE JOURNAL published photographs of the top graduates at the other three Service Academies.

Capt. Joseph D. Lafleur, jr., has received a Doctorate in Mechanical Engineering from Catholic University in Washington, D. C. A '51 USMA graduate, he is Assistant to the Chief of the Training Branch of the Nuclear Power Field Office, Ft. Belvoir, Va.

Captain Ira R. Ehrlich, Army Ordnance Corps, has been awarded the Doctor's Degree at the University of Michigan School of Engineering—first ever awarded for research in the new field of Off-the-Road Locomotion Mechanics.

Captain Ehrlich, USMA '50, received his Master's Degree in Engineering Sciences at Purdue University in 1956, and has been conducting research in Land Locomotion for the past four years at the Ordnance Corps Land Locomotion Laboratory at the Detroit Arsenal.

David D. Hallock, son of Brig. Gen. Duncan Hallock, 5412 Albia Road, Washington, D. C., received his B.S. degree in Physics from the Georgia Institute of Technology, and was commissioned a Lieutenant, Artillery, U.S. Army Reserve and designated a Distinguished Military Graduate. Lieutenant Hallock was graduated from Georgia Military Academy, College Park, Ga., in June 1956. While a student at Georgia Tech he was staff editor for the School Annual, The Blue Print, member of Pershing Rifles, Scabbard and Blade, Beta Theta Pi Social Fraternity and honor societies: Phi Kappa Phi, Phi Eta Sigma, Treasurer of Tau Beta Pi and Secretary of Sigma Pi Sigma.

Capt. James S. Furst, USMC, was graduated from the School of Government and Public Administration of The American University, Washington, D. C., 5 June with a Master of Arts degree in Public Administration. Stationed at the Marine Corps Schools, Quantico, Va., he is retiring in September and plans to go into city management in California.

SERVICE FAMILY NOTES

Family Editor
Louise B. McGiffertAssociate Family Editor
Bertie Johnson

Robert W. Crowder, 19-year-old son of Col. and Mrs. Murray Crowder of Tyndall AFB, Fla., will enter the U. S. Air Force Academy 27 June.

Ellen Jean Vandayburg, 17-year-old daughter of Lt. Col. and Mrs. Kenneth D. Vandayburg, will represent Narbonne High School at the 17th Annual American Legion Girls State session 20-28 June, on the Davis Campus of the University of California.

Colonel and Mrs. Vandayburg, who have another daughter, Sandra Ruth, 11, reside at 4835 Rock Bluff Road, Rolling Hills, Calif. He is Chief of Plans and Programs Division for the MINUTEMAN Weapon System, Air Force Ballistic Missile Division in Los Angeles.

Robert A. Hill, 14, son of S/Sgt. Henry Hill, stationed at Allied Air Forces Southern Europe in Naples, was flown to Washington, D. C., to receive special recognition at the Pentagon and White House for his letter of 6 June 1959 which led to the raising of \$400,000 to provide medical supplies for Dr. Albert Schweitzer's hospital in French Equatorial Africa. Robert has received an eight year college scholarship for medical studies from Ralph L. Smith, a Kansas City, Mo., lumberman.

Robert's letter to Lt. Gen. Richard C. Lindsay, USAF-Ret., then Commander of AAFSE, resulted in a spontaneous campaign to aid Dr. Schweitzer's hospital.

Capt. E. L. Farrington, Commanding Officer, NAS Alameda, Calif., recently administered the oath of a commissioned officer to his son, Ens. Richard E. Farrington, upon his completion of the Navy's Aviation Cadet Training Program at Kingsville, Tex. After spending a short leave with his parents, Ensign Farrington reports to Anti-Submarine Warfare Squadron 33 at NAS North Island, San Diego.

Elizabeth Anne Simpson, daughter of Col. and Mrs. Ralph T. Simpson, USA-Ret., Fayetteville, Ark., has been initiated into Phi Beta Kappa at the University of Arkansas. Miss Simpson, a mathematics major, received her Bachelor of Arts degree from the University 4 June.

David A. Petty, son of Col. and Mrs. Travis L. Petty, USA-Ret., 88 Harwood Road, East Greenwich, R. I., has been named an honorary National Merit Scholar. He and a classmate, **Robert F. Bergeron, Jr.**, son of Cdr. and Mrs. Robert F. Bergeron, 100 Grasslands Rd., East Greenwich, have been awarded General Motors Scholarships. Commander Bergeron is on duty at the Quonset Point Naval Air Station. Both young men will enter Brown University in the fall where they will study applied mathematics.

Wayne D. Corder, 20-year-old son of Lt. Col. and Mrs. Willis C. Corder, has been accepted for entrance to the U. S. Air Force Academy, where he reports 27 June. He received his appointment through a principal nomination from Vice President Nixon. Wayne also received an appointment to West Point through a nomination from Senator Symington (D-Mo.). During the past

SAC WIVES GET WORD ON HUSBAND CARE

(The following is the text of an "Appeal To Wives," written by Col. Thomas H. Crouch, Medical Group Commander at Carswell AFB, Tex. It has been circulated by SAC Headquarters).

SOCIOLOGISTS maintain that the average woman's burden is becoming easier, whereas that of her spouse follows an opposite trend. This seems to be confirmed by the fact that the average wife can expect to outlive her husband by nearly 10 years.

With job specialization and career competition continually growing, the male's burden increases. The ulcers, nervous disorders, strokes and heart attacks common today are testimony to the pressures confronting the Air Force breadwinner.

As physicians, we recognize that excessive worry, frustrations, anxiety and fatigue are direct factors in many cases of ill health.

Your husband has been carefully examined and trained, for our Air Force demands a high level of technological know-how, specialization and physical fitness. You, as his wife, have a most important role in maintaining him at his best.

Does he often complain of exhaustion? Have your social activities been too demanding of time better spent at rest?

Some husbands leave home for work without adequate breakfast, only to give out in mid-morning. Do you make breakfast for your husband? Do you feed him properly balanced meals? Enough salads and proteins? Are you helping him to watch his weight?

Does he worry about end-of-the-month bills? Are you adding to those bills, those worries?

Do you attempt to create a peaceful and happy atmosphere in the home when he returns from work? Or do you greet him at the door with your list of complaints and the day's frustrations?

Do you allow the children to be noisy when he is tired? Do you insist on entertaining or accepting invitations from persons he dislikes?

Your husband may be a big wheel on the base, but underneath that uniform he is a simple creature, with all the needs of the next human. So, give him a feeling of security and importance. Make him think he is eating better and receiving more tender loving care than he ever did before. Make home a refuge of peace and quiet.

With a little effort you'll succeed in making him a more efficient, well adjusted and happier husband. You will add years to his life—and life to your years.

Don't try to remake him. Just try to preserve him.

MRS. Haydon L. Boatner, wife of the Army Provost Marshal General, admires a silver tray presented to her during the last Military Police Officers Ladies luncheon of the season at Arlington Hall, Va. Looking on are, left to right, Mrs. Siegfried Spillner, retiring Chairman; Mrs. Raymond R. Ramsey, whose husband is Provost Marshal of the Eighth Army, and Mrs. Harold L. Taylor, wife of the Deputy Provost Marshal General and Chairman for the group next season.

Service Weddings and Engagements

THE U. S. Navy Chapel, Washington, D. C., was the setting for the afternoon ceremony 11 June, uniting in marriage Miss Rowena Stanley, daughter of Mrs. Gotshall Stanley of Washington, and of Capt. Emory D. Stanley, Jr., SC, USN, of Seattle, Wash., and Ens. Joseph Davies Jaap, USN, son of Radm. (USN) and Mrs. Joseph A. Jaap of Washington and Seattle.

Photo by Southall
Mrs. Jaap

Given in marriage by her father, the bride chose her sister, Miss Joan Stanley, as her maid of honor, and Misses Susan Willis, Mary Ann Haldeman and Mrs. John McClanahan as bridesmaids, with another sister, little Miss Marilyn Stanley, as flower girl. Mr. Samuel H. Wyman served as best man for the bridegroom and ushers included Ensigns Richard Birtwistle, III, W. T. Parlette, W. A. Pezet, George Gould, all USN, 2d Lt. E. A. Grinim, USMC, Mr. Thomas G. Lee, II, and Mr. Peter S. Maroulis.

Mrs. Jaap, granddaughter of Mr. and Mrs. Irvin E. Gotshall of Westtown, Pa., and of Radm. Emory D. Stanley, SC, USN-Ret., of Westfield, N. J., was graduated this month from the University of Delaware. Her husband, USNA '60, prepared at St. John's College High School.

Following a wedding trip, the couple will make their home at Norfolk, Va.

HAINES-TUCKER—Mr. and Mrs. William Luther Tucker of Richmond, Va., announce the engagement of their daughter, Patricia Ann, to Lt. Robert Guy Haines, Jr., USAF, son of Colonel (USA) and Mrs. Haines of 4845 26th St., No., Arlington, Va.

Miss Tucker attended the East Carolina College and her fiancé is a graduate of VMI.

A September wedding is planned.

ROOME-MUNROE—In an evening ceremony at St. John's Episcopal Church, Ocean Springs, Miss., Miss Lynn Duncan Munroe, daughter of Col. (USAF-Ret.) and Mrs. Charles Lawrence Munroe, Jr., of Ocean Springs, became the bride of Mr. Peter Doremus Roome, son of Dr. Norman and Henrietta Roome of New York and Roxbury, Conn.

The bride was given in marriage by her father and had as her matron of honor, Mrs. George J. Otto, daughter of Maj. Gen. (USAF-Ret.) and Mrs. Merrill Davis Burnside, with her cousin, little Miss Blythe Allen as flower girl. Dr. Norman S. Roome, Jr., served as his brother's best man, and ushers included Messrs. William R. Allen, Jr., uncle of the bride, Neilson Abeel and H. B. Pauly.

Mrs. Roome attended Carnegie Institute of Technology and the University of Mississippi and is a member of the Kappa Alpha Theta sorority. Her bridegroom, a graduate of Columbia University and a member of the Alpha Delta Phi fraternity, is a candidate for a Master's degree at Columbia's School of Business.

The couple will make their home in New York City.

DUNSFORD-HOGAN—Maj. (USA-Ret.) and Mrs. George J. Hogan of 22122 Sherman Way, Canoga Park, Calif., announce the engagement of their daughter, Mary Louise, to A/C Thomas E. Dunsford, USAF, son of Mr. and Mrs. Thomas J. Dunsford of Bennington, Vt., S. C.

Miss Hogan is a graduate of Mt. St. Mary's College. Her fiancé is currently stationed at Oxnard AFB, Calif.

A late July wedding is planned, to take place at Our Lady of the Valley Church, Canoga Park.

Funds' Cut Will Delay Maintenance Work On Wherry, Capehart Family Housing

THOUSANDS of military families who live in Wherry and Capehart housing units may be forced to get along without a needed paint job or other necessary maintenance work on their Government quarters during the next 12 months.

The House voted (THE JOURNAL, 7 May) to cut more than \$11 million from maintenance funds requested by the President. The Senate Appropriations Committee has boosted the cut to \$20.5 million.

This is almost 20% of the total amount requested.

In approving the House cut and adding a further reduction of its own, the Senate Committee criticized the Pentagon for not having a "more accurate accounting system" for maintenance funds.

The Committee said information it has developed "regarding maintenance of Government-owned family housing on military installations establishes that the

Department of Defense has no policy for total maintenance nor for separate accounting of the costs of maintenance for such housing."

These "deficiencies," the Committee said, "are due to the failure of the Department to establish any uniform policy concerning maintenance or to require that funds appropriated for maintenance be actually so used."

The Committee has asked the Depart-

ment to select 12 or more military installations in "various geographical locations" and make a thorough study of the costs and procedures involved in maintaining military family housing in those areas. Progress of the study is to be reported to the Committee on 1 April, next year.

The Committee also asked the Department to "investigate the possibility of further savings through the introduction of contractual maintenance procedures."

HEIL-KNIGHT—Lt. Col. (USAR-Ret.) and Mrs. Jerome P. Knight of Vienna, Va., announce the marriage of their daughter, Barbara, to 2d Lt. Thomas C. Heil, jr., USMC, son of Mr. and Mrs. Heil of Arlington, Va., in a double ring ceremony and Nuptial Mass at the Roman Catholic Church of Our Lady of Good Counsel, Vienna, 11 June.

The bride was given in marriage by her father and was attended by Miss Nancy Pettis. Mr. Neal E. Monette served as best man and ushers were Messrs. Terrance Ireland and E. R. Dieterle.

Mrs. Heil has been employed in the Office of the Surgeon General. Her husband is a graduate of the University of South Carolina.

Upon their return from a New England wedding trip, the couple will reside at Quantico, Va., where Lieutenant Heil will be a student at the Marine Corps School.

MARTIN-WILLS—The Post Chapel, West Point, N. Y., provided the setting 8 June for the ceremony uniting in marriage Miss Ellen McClung Wills, daughter of Mr. and Mrs. Jesse Ely Wills of Nashville, Tenn., and 2d Lt. Williams Swift Martin, jr., USA, son of Mr. and Mrs. Martin of Washington, D. C., with Bishop Ansen Phelps Stokes, jr., of the Protestant Episcopal Diocese of Massachusetts, and godfather of the bridegroom, officiating.

Given in marriage by her father, the bride chose Miss Mary V. Martin, sister of the bridegroom, as her maid of honor, with Misses Ann E. Martin, another sister, Frederica E. Lincoln, Ann M. Harwell and Mandy G. Simpson as bridesmaids. Lt. Lyell F. King, USA, served as best man for his classmate, and ushers were Lts. C. P. Otstott, T. F. Schatzman, E. W. Eubanks, N. S. Fox, H. E. H. Ladehoff, D. H. Campbell, F. D. Finn and G. H. McManus, all USA.

Mrs. Martin is a graduate of Holton-Arms Junior College and of Vanderbilt University, where she was a member of the Alpha Omicron Pi sorority. Her husband, who is an alumnus of St. Paul's in New Hampshire, St. Alban's School, Washington, and Cornell University, had graduated from the USMA earlier that day. The grandson of Mrs. W. Swift Martin of Washington, and the late Captain Martin, Cav., USA, and of the late Reverend Canon and Mrs. George Prewer, Lieutenant Martin is the great-great-grandson of Bvt. Brig. Joseph G. Swift, the first USMA graduate, who later became Superintendent of the Academy.

CALDWELL-MATHERS—The Cadet Chapel, West Point, N. Y., 9 June was the setting for the ceremony when Miss

Photo by L. D. LeMan
Mrs. Caldwell

The bride, who was given in marriage by her father, had three bridesmaids and two junior bridesmaids as her attendants, and Mr. John Caldwell served as his brother's best man. Mr. Wade H. Stephens, III, ushered and six of the bridegroom's USMA classmates were saber bearers.

Mrs. Caldwell, who was graduated from Florida State University this month, is the grand-niece of the late RADM. Hutchinson I. Cone, USN-Ret., and a cousin of Capt. D. N. Cone, USN-Ret., Capt. James I. Cone, USN, and Col. H. I. Cone, jr., USA. Her husband, who was quarterback on the Army football team, was graduated from the USMA the day before the wedding.

Upon their return from a honeymoon in New England, Canada and Florida, the young couple will be stationed at Ft. Belvoir, Va.

60TH ANNIVERSARY

Col. and Mrs. James P. Barney, USA-Ret., celebrated their 60th wedding anniversary on 6 June.

They reside at 61 Westcott Road, Princeton, N. J.

Colonel Barney, who won the DSM in 1918, retired in 1939.

At an anniversary celebration, he pinned his medal on Mrs. Barney, the former Eva Douglas Wise, "for 60 years of distinguished service."

BAUERS-MOORE—In an afternoon ceremony 5 June at the Post Chapel, Ft. Eustis, Va., Mrs. Frances Clarke Moore, daughter of Mrs. W. Clarke of Newport News, Va., became the bride of Maj. William Bauers of Ft. Eustis.

The bride, who was given in marriage by her son, Mr. Terrel Moore, had Mrs. Herman M. Parker as her matron of honor, and her daughter, Miss Anne F. Moore, as junior bridesmaid. Col. Austin J. Montgomery served as best man and Col. Frank Adams and Maj. George H. Olson were ushers.

Upon their return from a southern wedding trip, the couple will prepare to leave for Major Bauers' new assignment at Cadiz, Spain.

ALEXANDER-WILSON—In an afternoon ceremony 12 June at the Post Chapel, Ft. Leavenworth, Kans., Miss Carole Wilson, daughter of Col. and Mrs. Jasper J. Wilson of 12 Sumner Pl., Ft. Leavenworth, became the bride of 2d Lt. Norman C. Alexander, USAF, son of Mr. and Mrs. F. Howard Alexander of Jefferson City, Mo.

Attended by Misses Ann Waldorf, Susan Schien and Wendy Wilson, the bride was given in marriage by her father. Mr. George Alexander served as his brother's best man and groomsmen included Capt. John Farnella, Clement Eagen, Robert Murren and Lt. William Currier.

Lieutenant Alexander was graduated from the USAFA 8 June. Following a wedding trip to Mexico, he will report to Moore AB, Tex., where he and his bride will make their home.

HERNLY-KIMBALL—RADM. (USN) and Mrs. Leland Porter Kimball, jr., of 508 Crestwood Dr., Alexandria, Va., announce the marriage of their daughter, Dorothy Lee, to Mr. Harold Granville Hernly, jr., son of Mr. and Mrs. Hernly, also of Alexandria, in an afternoon ceremony 11 June at the Westminister Presbyterian Church, Alexandria.

Photo by Glogau
Mrs. Hernly

Mrs. Hernly, whose father has been serving as Deputy Chief of the Bureau of Supplies and Accounts and is leaving in July to assume command of the Naval Supply Center at Oakland, Calif., is a recent graduate of the Johns Hopkins School of Nursing. Her husband, who is a graduate of Lake Forrest College in Illinois, is now a student at American University's Law School.

The couple will make their home in Arlington, Va.

GILMARTIN-HENNESSEY—Mr. and Mrs. Edward J. Hennessey of Bayonne, N. J., announce the marriage of their daughter, Grace Carol, to Lt. Michael William Gilmartin, son of Col. (USA-Ret.) and Mrs. Austin F. Gilmartin of 2070 Joliet St., Aurora, Calif., 11 June at Our Lady Star of the Sea Church, Bayonne.

Mrs. Gilmartin, who was graduated from the Holy Family Academy and attended Fordham University, has been employed as a staff assistant for the Esso Research and Engineering Company, Linden, N. J. Her bridegroom was graduated from the USMA 8 June.

WALLACE-BATTON—Lt. Col. (USA-Ret.) and Mrs. Wyatt G. Batton of 191 Raymond Rd., West Hartford, Conn., announce the engagement of their daughter, Anne Fuller, to Mr. Thomas Joseph Wallace, jr., son of Mr. and Mrs. Wallace of Queen's Village, N. Y.

Miss Batton is a graduate of the University of Connecticut, where she was a University Scholar, a member of Phi Beta Kappa, Phi Kappa Phi, the Kappa Alpha Theta sorority and an associate member of Sigma Xi. Her fiancé, now associated with the Esso Research and Engineering Co. of Linden, N. J., was graduated from St. Francis College and received an M.S. degree and a Ph.D. degree in Organic Chemistry from the University of Connecticut. He is a member of the Sigma Xi and Phi Lambda Upsilon fraternities.

SWENSEN-CARPENTER—Brig. Gen. (USAF) and Mrs. John W. Carpenter, III, of Edwards AFB, Calif., announce the marriage of their daughter, Carol Sue, to Mr. John Charles Swensen, son of Mr. and Mrs. Arthur L. Swensen of Huntington Beach, Calif., at the Wee Kirk o' the Heather, Glendale, Calif., 3 June.

Mrs. Swensen

Given in marriage by her father, who commands the Air Force Flight Test Center, the bride had her sister, Miss Jean Carpenter, as her maid of honor and only attendant. Mr. Roger Lydell was best man for the bridegroom, and Mr. John W. Carpenter, IV, ushered.

The couple will make their home in the Los Angeles area, where Mr. Swensen is manager of the Telautograph Service in Inglewood.

MacDONALD-BURD—Col. (USA) and Mrs. Howard Henry Burd of USAREUR Headquarters, Heidelberg, Germany, announce the marriage of their daughter, Jane Ann, to 2d Lt. Gerald E. MacDonald, USMC, 28 May at the Chapel of the Centurion, Ft. Monroe, Va. The bridegroom is the son of Mr. and Mrs. G. H. MacDonald of Woodbridge, Va.

In the absence of her father, the bride was given in marriage by Col. Wayne S. Hume, USA, and she was attended by Miss Judy Ewing. Mr. Gary Ennis served as best man.

Both Lieutenant MacDonald and his bride are graduates of Pennsylvania State University, where she was a member of the Pi Beta Phi sorority, and he of the Phi Kappa Psi fraternity.

They are now at home at 58-A Purvis Dr., Triangle, Va.

SHARP-RITCHIE—Col. (USA) and Mrs. Charles Alexander Ritchie of Ft. Benning, Ga., announce the engagement of their daughter, Patricia Elizabeth, to Lt. Richard Harry Sharp, USA, son of Mr. and Mrs. Roy R. Sharp of Overland Park, Kans.

Miss Ritchie has been a student at the University of Maryland, where she is a member of the Kappa Alpha Theta sorority and an honor student in the College of Home Economics. She is the granddaughter of Mrs. A. T. Hurley of Biscoe, N. C., and of Mr. and Mrs. C. E. Ritchie of Statesville, N. C. Currently stationed at Ft. Hood, Tex., her fiancé attended Kansas State College and is a graduate of the Officer Candidate School at Ft. Benning.

The wedding is planned for August at Ft. Benning.

Mrs. Tieman Installed At Ft. Sam Houston

MRS. Wilbert A. Tieman, newly-elected President of the U.S. Army Garrison Officers Wives' Club, Ft. Sam Houston, Tex., and Mrs. Frederick Scherberger 3d, outgoing President, are pictured at recent installation ceremonies.

Other officers are Mesdames Ivan C. Dimmick, jr., 1st vice president; Genous S. Hodges, jr., 2d vice president; Simon Y. Rodriguez, Secretary, and Charles R. Ikerman, Treasurer.

GUNTHER-WITHEROW—Mrs. William Witherow of Gettysburg, Pa., announces the marriage of her daughter, Doris Jean, to Mr. James H. Gunther, son of Col. (USA-Ret.) and Mrs. Herbert J. Gunther of Santa Maria, Calif., 4 June at the Calvary Presbyterian Church, San Francisco, Calif.

Mr. Gunther, now associated with the Wells Fargo Bank-American Trust Co., San Francisco, and a veteran of three years' service with the Army, is a graduate of the University of Virginia, where he was a member of the Theta Chi fraternity.

The couple are now at home at 476 Seventh Ave., San Francisco.

ARDC Manpower Study Covers Promotion, Pay, Retirement Policies

From first page—

the nation-wide command is faced with the prospect of critical manpower losses in highly specialized aerospace projects.

Unless present manpower policies are amended—and General Schriever hopes they will be—ARDC in the next five years must reckon with the loss of more than one out of three of its officers who possess a primary R&D qualification.

At the forthcoming ARDC Commanders Conference, General Schriever intends to discuss at length with his commanders "Accent On People" proposals developed by a command-wide committee, led by Col. Frank J. Seiler, Chief of the Science Division at ARDC Headquarters.

In an interview with THE JOURNAL, Colonel Seiler said the comprehensive report—it is more than an inch thick with even more detailed back-up data—will cover the full spectrum of military and civilian manpower problems.

Mission Told

This will be in accord with the charter presented to the Personnel Review Committee by General Schriever. He stated the mission succinctly:

"Review the total ARDC personnel situation, policies and problems."

The Committee was told:

"Clearly set forth the ARDC goals and policies in the Personnel area."

General Schriever said that he and his commanders need to know what actions can be taken within ARDC, and what require "outside action" at USAF Headquarters, Department of Defense, Civil Service Commission, and other government agencies.

Colonel Seiler said that his committee has received the "enthusiastic support"

from all ARDC activities. He noted that more than 300 suggestions were submitted from the field.

These cover such areas as recruitment and retention, education, career development, promotions, assignments, elimination of substandard personnel, recognition for outstanding ARDC members, public information, prestige, and pay.

The Personnel Review Committee has explored the impact of cutbacks in proficiency flying.

In this regard, it is well known that General Schriever played a key role in the Air Force decision to suspend an order which would have eliminated 2107 officers from flying status. Many of these were in top R&D slots.

The Seiler Committee examined the need for accrual pay for rated personnel, which has been advocated on Capitol Hill by General Thomas D. White, CofS.

New Pay Plan

The ARDC Committee also has studied a proposal for Technical-Management Pay.

This would provide extra incentives for officers to win graduate degrees.

Under this suggestion, an ARDC officer with a PhD, for example, who is filling a position of great responsibility in his field, would receive special pay recognition.

The 20-year retirement rules pose another formidable problem for General Schriever and his commanders.

ARDC could lose during the next five years as a result of retirements 1034 out of 3321 officers with a primary specialty in research and engineering. Of this number, 96% have degrees, and about 55% have master degrees or doctorates.

General Schriever and his commanders fear that such a loss would have a major impact on the Air Force "blue suit" capability in the missile and space fields.

It is anticipated that after the ARDC Commanders have held their special ses-

sion on "Accent On People," General Schriever will take steps to inform all members of the command regarding further details of the program.

He has made it a particular point to keep ARDC people fully advised of all developments in the program.

GENERAL SCHRIEVER'S "ACCENT ON PEOPLE" DIRECTIVE TO PERSONNEL REVIEW COMMITTEE

(This is the text of the instructions provided by Lt. Gen. Bernard A. Schriever, ARDC Commander, for his Personnel Review Committee.)

A COMPLETE review will be made of the Command Personnel Program for the purpose of recommending changes were desirable to achieve the greatest possible utilization, effectiveness, retention and morale of both military and civilians in ARDC.

To: 1. Review the total ARDC personnel situation, policies and problems.

2. Get a unified approach in ARDC toward the attainment of Command goals from a personnel standpoint.

3. Incorporate division and center commanders' ideas and suggestions.

4. Clearly set forth the ARDC goals and policies in the Personnel areas.

5. Define short range, intermediate and long range programs to be initiated and time-phasing for same in order that a complete and meaningful picture of the Personnel Program can be presented.

Determination will be made as to which actions can be accomplished within ARDC and what requires outside action such as by Headquarters USAF, DOD, Civil Service Commission and other government agencies.

Comments or recommendations in the areas of recruitment, retention, prestige enhancement, elimination of sub-standard personnel; career planning, monitoring and development; Institute of Technology program; assignment policies; how a public and internal information program can best be utilized on behalf of ARDC personnel; and on any other subjects in Personnel Field, Military or Civilian.

ARDC Personnel Committee Membership

The following is the membership of the ARDC Personnel Review Committee:

Name	Place of Assignment	Duty Position
Col. Frank J. Seiler	Headquarters ARDC	Chf. Science Division, DCS/R&E
Mr. A. H. Abernathy, jr.	AF Missile Develop. Center	Chf. Stratosphere Chamber Br., Technical Services Division
Lt. Col. S. W. Bowman, jr.	AF Special Weapons Center	Chf. Programs Br., DCS/Opns
Mr. Norman G. Bitterman	AF Missile Test Center	Tech. Director, Dep Comdr/Test
Lt. Col. Milton R. Buls	AF Ballistic Missile Div.	Chf. Plans Div., Directorate of Plans, DCS/Plans & Opns
Mr. Lester J. Charnock, jr.	Wright Air Development Div.	Tech. Dir., Systems Engineering
Maj. Max Findell	AF Missile Develop. Center	Chf. Missile Flight Safety Br., Range Opns Div.
Mr. Major T. Martin	ASTIA	Chf. Manpower & Personnel Br.
Lt. Col. W. A. Martin	Air Proving Ground Center	Chf. Tech Info & Analysis Office
Lt. Col. L. R. Reichardt	Rome Air Development Center	DCS/Personnel
Mr. Donald M. Ross	AF Flight Test Center	Depty Chf., Rocket Propulsion Dev. Division
Lt. Col. G. B. Schold, jr.	AFCCDD	Asst. DCS/Personnel
Col. Joseph M. Silk	Wright Air Development Div.	Chf. Aeromechanics Div.
Lt. Col. Richard C. Snyder	AF Ballistic Missile Div.	Chf. Policy Office

SAC SHIFTS

Col. George Y. Jumper, Commander of the 802d Air Division, will assume command of the 310th Bomb Wing upon deactivation of the 802d. Both units are located at Schilling AFB, Kans.

Col. Walter Y. Lucas, former Commander of the 310th, has been appointed Commander of the 9th BW at Mountain Home AFB, Idaho.

Hundreds Of Regular AF Officers Face Retired Credit Recomputation

From first page—

the Regular Establishment under the provisions of the appointment act of 28 December 1945, 59 Stat. 663, 10 U.S.C. 505c, 1946 edition.

Most of the affected officers are those who left the Service for a short time, and returned to take up Regular career status under the 1945 act.

For those already retired, the Comptroller's ruling is seen as potentially affecting their retired pay computations and in some cases possibly their right to retired pay.

Air Force officials this week estimated that approximately 14,000 officers were integrated under the 1945 act, but they could not say immediately just how many officers will be affected by the Comptroller's decision.

Comptroller General Joseph Campbell gave his new ruling (B-142419) after a similar opinion was issued by the Judge Advocate General of the Army.

The Air Force disagreed with the Army position, contending that creditable service for officers appointed under the 1945 act should include all time from the date of appointment.

Comptroller General Campbell took the Army side.

Following is the text of Comptroller Campbell's decision as reported to Secretary of Defense Gates:

Dear Mr. Secretary:

Reference is made to letter of March 25, 1960, from the Assistant Secretary of Defense (Comptroller) requesting decision as to whether an officer appointed in the Regular Army under authority of the act of December 28, 1945, 59 Stat. 663, 10 U.S.C. 505c, 1946 Ed., may include as creditable service for retirement purposes under sections 3919 and 3921, Title 10, U.S. Code, "the time between the date of his appointment under that act and the date of acceptance of such appointment as evidenced by a signed oath of office." The issue presented is set forth in Department of Defense Military Pay and Allowance Committee Action No. 262.

Army-AF Views Differ

Committee Action No. 262 discloses that The Judge Advocate General of the Army has rendered an opinion that the service creditable under the act of December 28, 1945, does not include the time between the date of appointment and the date of acceptance of such appointment as evidenced by a signed oath of office. It is stated, however, that the policy of the Department of the Air Force in this matter is to include the time from the date of the special orders announcing the appointment to the date of acceptance of such appointment in the computation of the number of years of service creditable for purposes of the act of December 28, 1945. The further observation is made that "It, therefore, appears that the opinion of the Army Judge Advocate General in this area is a ruling which administratively precludes the crediting of service to certain individuals which is authorized by law."

Presumably the mentioned Air Force policy is predicated upon the provisions of section 208(a) of the Armed Forces Regular Officer Augmentation Act of 1956, 70 Stat. 586, re-enacted as section 27 of the act of September 2, 1958, 72 Stat. 1562, permitting an increase

Group, Ft. Benning, Ga. Mrs. Corder is the former Dorris Griffith of Orlando, Fla. and New Bedford, Mass.

of up to two years in the years of service credited to an officer of the Regular Air Force on July 20, 1956, for the purposes of 10 U.S.C. 8927(a)(1). Similar provisions for additional service credit for Regular Army officers in the service on July 20, 1956, however, were purposely omitted from the 1956 act. The reasons for this omission are explained in Senate Report No. 2420, to accompany H. R. 11683 which became the 1956 act, as follows (page 7):

"This legislation contains no authority whereby the Department of the Army may increase the promotion-list service of its existing Regular officers. Such authority was not requested for two reasons. First, no additional credits are required for the purpose of reducing the Army hump or for accelerating Regular promotions. Second, any adjustment from the standpoint of equity would be extremely difficult. For example, since 1932 the Army has integrated officers under varying programs which has denied them full credit for their prior commissioned service for promotion-list purposes. On the other hand, the Army in 1946 integrated officers and awarded them up to 20 years' constructive credit for promotion-list purposes, with the result that years never actually served were awarded for promotion-list and mandatory retirement purposes."

Grades Up To Major

Under section 4 of the act of December 28, 1945, as amended, the President was authorized to appoint and commission additional officers in the Regular Army, by and with the advice and consent of the Senate, in grades up to major, subject to the qualifications therein prescribed including honorable active Federal service as commissioned officers in the Army of the United States, or any component thereof, on or after December 7, 1941. Section 5 of the 1945 act, 59 Stat. 664, provided in pertinent part as follows:

"Each person appointed as a commissioned officer of the Regular Army under the provisions of section 4 of this Act shall be credited, at the time of appointment, with service equivalent to the total period of active Federal service performed by him after attaining the age of twenty-one years as a commissioned officer in the Army of the United States or any component thereof from December 7, 1941, to the date of such appointment, or a period of service equal to the number of days, months, and years by which his age at the time of such appointment exceeds twenty-five years, whichever is the greater: *Provided*, That in computing the total period of active commissioned Federal service of any such person who was honorably discharged or relieved from active service subsequent to May 12, 1945, there shall also be credited the period from the date of his discharge or relief from active service to the date of his appointment in the Regular Army under the provisions of section 4 of this Act. * * * (Italics supplied.)"

Section 9 of the act as added by the act of May 15, 1947, 61 Stat. 95, provided that:

For the purpose of administering the provisions of this Act, the date of nomination by the President if the Senate is in session, or if the Senate is in recess the date of a recess appointment by the President, shall be considered as the date or time of appointment in determining eligibility for appointment, permanent grade in which appointed, date of rank in such grade, period of service to be credited under section 5 thereof, and eligibility for promotion of each person appointed as a commissioned officer of the Regular Army under the provisions of this Act: *Provided*,

That no person appointed under the provisions of this Act shall be entitled, by reason of such appointment, to any pay or allowances for any period prior to the date of acceptance of such appointment." (Italics supplied.)

Commissioned officers of the Regular Army with "30 years of service computed under section 3927(a)" of Title 10, U. S. Code, are eligible for retirement under the provisions of sections 3919 and 3921 of that title. Section 3927(a) of Title 10, provided in pertinent part as follows:

"(a) For the purpose of determining whether a regular commissioned officer may be retired under section 3913, 3915, 3916, 3919, 3921, 3922 or 3923 of this title, his years of service are:

"(1) For a commissioned officer appointed in the Regular Army before January 1, 1948, under the Act of December 28, 1945, ch. 601 (59 Stat. 663), the service credited to him under that act at the time of his appointment, plus his years of active commissioned service in the Regular Army after that appointment."

The restatement of section 3927(a) in the act of September 2, 1958, section 1 (98), 72 Stat. 1488, was "without substantive change." Section 34(a), 72 Stat. 1568.

"Unambiguous"

The quoted language of section 3927(a) is definite and unambiguous. It provides that in the case of an officer appointed in the Regular Army before January 1, 1948, under the provisions of the act of December 28, 1945, service creditable for the purpose of determining his eligibility for retirement under sections 3919 and 3921, Title 10, U. S. Code, is the service creditable to him under the 1945 act "at the time of his appointment, plus his years of active commissioned service

in the Regular Army after that appointment." Section 9 of the 1945 act, as added by the act of May 15, 1947, 61 Stat. 95, expressly provided that the date of nomination by the President if the Senate is in session, or if the Senate is in recess the date of a recess appointment by the President, shall be considered as the date or time of appointment in determining the period of service to be credited under section 5 of that act, and only "active commissioned service in the Regular Army after that appointment" is creditable. As pointed out in Committee Action No. 262, however, there normally was a lapse of time between the date of an appointment under the 1945 act and the date of acceptance of the proffered commission in the Regular Army and it is this critical period which the Army excludes under the provisions of section 3927(a), in determining the eligibility of officers of the Regular Army for retirement under sections 3919 and 3921.

Must Be Accepted

"Generally, a proffered commission in the Regular Army does not give rise to a Regular Army commissioned status until it is accepted. . . . We find nothing in the language or legislative history of the added section 9 of the 1945 act which would require a different conclusion with respect to appointments under that act. Hence, active commissioned service under such an appointment could not begin until the date of formal acceptance of the commission. Accordingly, we see no legal basis upon which it may be concluded that any part of the period between the date of appointment for the purposes of section 5 of the act of December 28, 1945, and the date of acceptance of such appointment properly may be considered as constituting creditable service for the purposes of 10 U.S.C. 3927(a)."

Space Surgeons Course Opens At Missile Center

THE Free World's first training program for space surgeons opened 6 June at the Air Force Missile Test Center, Patrick AFB, Fla. Key figures in the new program are left to right, Maj. Gen. Leighton I. Davis, Commander of the AFMTC; Maj. Gen. Oliver K. Niess, Air Force Surgeon General, and Col. George M. Knauf, AFMTC Staff Surgeon and head of the new program.

Attending the two-week course are medical officers from the Air Force, Army and Navy.

General Niess told the group that the course, officially called "Medical Aspects of Space Operations," was a milestone in medical history. He said those selected were carefully chosen by their respective services for future assignment as space surgeons.

The new course will be offered on a continuing basis at the AFMTC. Its purpose, according to Colonel Knauf, is to make available a pool of qualified medical officers from the three services who will be able to perform duty as space surgeons to support future requirements of the NASA's Project MERCURY and other man-in-space programs that will follow.

Col. Leland Quits Okinawa For D. C. Chemical Post

Col. Alanson T. Leland has completed a tour as Provost Marshal, U. S. Army Ryukyu Islands/IX Corps and with Mrs. Leland and their four sons have left Okinawa en route to Washington, D. C. He will assume duties in the Office of the Chief Chemical Officer.

AF Medical Men Tell Space Needs

LACK of a sufficient reservoir of advanced medical knowledge has been posed as a major problem confronting future advances in space exploration.

In a paper presented to members of the American Medical Association in Miami this week, two of the Nation's foremost space medicine experts charged that we "are rapidly using up our accumulated medical knowledge which has an application to space technology."

The two prominent Air Force physicians are Maj. Gen. Otis O. Benson, Jr., Commander of the USAF Aerospace Medical Center, Brooke AFB, Tex., and Col. Paul A. Campbell, also of the Center. "Sooner, rather than later," they said, "we must obtain new knowledge in order to use the energies of space in perfecting our closed ecological systems. Scientific discoveries are needed, as well as advancements in technology, if we are to do more than skirt the fringe of space and be content with limited probes and limited observations."

They told the AMA that "Engineering technology is advancing so rapidly that challenge after challenge is being extended to industrial and environmental medicine."

"It is no pun," they said, "to state that the horizons of preventive medicine must be extended into space because no field of medicine can make a greater contribution and has so large an obligation."

CBR Warfare

From page 7—
treatment.

General McNinch stressed that in determining a defense against biological weapons, as "in the case of ionizing radiation, a double-barreled program is justified."

Biological weapons are not proven weapons systems, he said, "but if we are to be adequately prepared to defend our nation, it is essential that we determine whether it is a threat, how much of a threat if it is one, and how to protect ourselves if the need arises."

During the meeting, presentations on chemical, biological and radiological warfare problems and defenses were given by: Dr. Van M. Sim, Medical Research Director at the Army Chemical Center, Edgewood, Md.; Col. Dan Crozier, of the Office of the Army Surgeon General; and by Lt. Col. Carl L. Hansen, USAF.

50TH ANNIVERSARY

Col. and Mrs. Walter Bender celebrate their 50th Wedding Anniversary 19 June at their summer home in Encampment, Wyo.

Colonel Bender retired in 1946 after 41 years service in the Cavalry and Air Force.

Service Folk

From page 24—

Year Wayne has been a Freshman at Missouri School of Mines and Metallurgy, Rolla, and prior to that time attended Bradens Preparatory School, Cornwall-on-Hudson, N. Y. Colonel and Mrs. Corder have been residing in Bangkok, Thailand since 1958 where he has been assigned to the Engineer Section, JUSMAG to Thailand as Construction Advisor to the Royal Thai Army.

The Corders will return to the States 20 July aboard the Liner President Wilson from Hong Kong. Colonel Corder is being assigned to the 151st Engineer

Army Promotes 25 To Lt. Colonel

The following 25 officers have been promoted to temporary lieutenant colonel, with rank from 14 June, in Army S.O. 122.

Those promoted include majors through sequence number 1065, Army Promotion List, D.A. Circular 624-47, 9 March 1959. They are:

General Ridgway Addresses Graduates At Army War College Ceremonies

General Matthew B. Ridgway, USA-Ret., spoke to 200 members of the Class of 1960 at the Army War College, Carlisle Barracks, Pa., at graduation ceremonies, 16 June.

The former Army CofS also presented diplomas to the graduating officers.

This year's class at the War College, the 44th graduating since the College was founded, was the 10th class to complete the 10-month course since the College was located at Carlisle Barracks.

The class includes 176 Army officers, four Navy, four Marine, 10 Air Force officers and six civilians from the Department of State and other civilian government agencies.

Here are the graduates:

Abercrombie, J C Killen, G W, Col
L/C Kirk, W M, Col
Anderson, E E, Col Kirkbride, M V, Col
Arp, David H, Col Kiesel, E C, L/C
Baden, C H, jr, L/C Kohnert, H A, L/C
Bagnulo, A H, Col Kolsch, F P, Col
Balkman, J F, L/C Kolb, Roland L, Col
Ballard, J L, jr, Col Kramer, F E, Col
Bailet, H D, Col Kramers, J T, L/C
Barney, J C, jr, Col Krampitz, C T, L/C
Bell, Bruce A, Mr Krattenmaker, G R, Col
Benade, Leo E, Col Kulip, J C, jr, L/C
Bengel, L W, L/C Kuzell, R E, L/C
Bennett, R J, Col Land, Leroy C, L/C
Benson, W C, Col Langston, J V, L/C
Besson, Robert, Col Lanterman, J V, Col
Boatwright, L S, L/C Boggs, A D, L/C
Bolton, D P, L/C Laughlin, V V, L/C
Bowie, R T, Col Lee, Eugene M, Col
Bowie, T D, Mr Locksley, N M G, L/C
Brown, Greg J, Col Logan, E O, L/C
Brown, J P, L/C Malxner, H V, Col
Burke, W A, Col Maness, L E, Col
Campbell, R P, jr, Marsh, W H, Col
L/C Mayland, L P, L/C
Canella, C J, L/C McAdams, S C, L/C
Cannon, C C, L/C McGregor, E W, L/C
Cavanaugh, M A, McKillips, E J, Col
L/C McKnight, J T, L/C
Coffey, C F, Col Mehlinger, W E, L/C
Coleman, W S, L/C Miller, E G, Capt, USN
Conaty, F S, jr, L/C Milloy, A E, L/C
Conley, W H, L/C Monroe, T G, L/C

Walker, J K, jr, L/C Young, Hugh F, L/C

SFC Blankenship 1st In Army Pistol Meet

SFC William B. Blankenship of the Army Advanced Marksmanship Unit at Ft. Benning, Ga., has become one of the few men in the world to fire more than 2650 in pistol competition, according to range officials at the Army Rifle and Pistol Championship Matches held there last week.

He won the 1960 Army Pistol Championship and the Continental Army Commander's Pistol Trophy with his record-smashing 2650-123X. The old mark had been 2603, established in 1956.

Sergeant Blankenship fired three weapons in 14 individual matches. In competition against 350 top pistoliers from Army commands in every corner of the world, he fired the caliber .22, .38 and .45 pistols.

Only one other competitor in the matches broke the magic 2600 mark. S/Sgt. Roy Ratliff, also an AAMU shooter, fired 2600.

Range officials said that Sergeant Blankenship's score was the first on record fired with regular Army-issue ammunition. They said that usually the shooters in this competition use a shell with a lighter powder load and less recoil.

Another AAMU marksman was announced as the 1960 Army rifle champion. Sfc. Antonio Miranda set a new match record with his 992-87V out of a possible 200 points. The old record, posted in 1958, was 979-102V.

Placing second to Sergeant Miranda for the All-Army Rifle Championship was AAMU Sgt. Raymond E. Campbell with 989-72V. He was the top man in the 1960 Individual Excellence-In-Competition (Leg) Match fired Tuesday with his 250-30V, cracking the old mark by 2 points.

Army Fiscal Deputy Leaves Pentagon

Edward A. Bacon, a Wisconsin banker, industrialist and civic leader who has been Deputy Assistant Secretary of the Army for Financial Management, is the new Chairman of the U. S. Section, International Joint Commission, an independent government agency handling problems on water power and resources between Canada and the United States.

Mr. Bacon, who will be 63 on 24 June, received from Secretary of the Army Wilber M. Brucker the Army's highest civilian award, The Distinguished Civilian Service Medal.

Mr. Bacon's appointment by President Eisenhower was made to fill a post held by the late Douglas McKay, a former Secretary of the Interior. The position pays \$20,000 a year.

Army-Navy Men Graduate S. F. State

One Navy and 11 Army students were graduated 11 June from San Francisco State College with a Bachelor of Arts degree.

June graduates from San Francisco State are: Sfc Lillian Aronson, Presidio; Maj. Albert Brown, Oakland Army Terminal; Maj. Roscoe Cartwright, Presidio; Capt. James Davis, XV Corps; Capt. Cam Hurst, Sixth Army; M/Sgt Harold Leachman, XV Corps; Capt. George Nakamura, Sixth Army Training Group; LCDr. Raymond Reynolds, U. S. Navy; Capt. John Strasser, Oakland Army Terminal; Specialist Herta Weber, Presidio; Maj. Keith Whitwell, Sixth Army; and Maj. Warren Young, Sixth Army.

Births • Marriages • Deaths

Survived by his widow, Mrs Ruth W Morris, who was living in Munich; one son, Willard W Morris, Jr; and his mother, Mrs Mary V Morris. Burial Arlington National Cemetery, Washington, DC in mid-July.

NORTH—Died when the Navy twin jet bomber in which he was bombardier-navigator left the runway on take off and sank in 8 feet of water, Whidbey Island NAS, Wash 7 Jun Lt(jg) Richard D North, USN, 36.

CORRECTION

Having been misinformed on the photograph of Mrs. Thomas D. White presenting the White Cup to the 2,000th baby born at Andrews AFB, which appeared in last week's issue, THE JOURNAL wishes to state that the baby was Master Neil Loren Johnson, born to 2d Lt. and Mrs. James Loren Johnson on 10 May, and that young Neil has a two-year-old sister, Lsli.

Air Force Tells Colonel Promotion Plans Through 1969, Retirements In 1968 Will Hit 1,048 Peak Under New Plan

THE Air Force has released a detailed explanation of its new plan for permanent promotions to colonel, reported in last week's issue of THE JOURNAL.

The following is the text of a message sent by Lt. Gen. Truman H. Landon, Deputy CofS, Personnel, to major commanders.

1. With the passage of the Regular Officer Augmentation Act in 1956, the Air Force acquired sufficient grade vacancies to provide Regular permanent lieutenant colonels a reasonable opportunity to progress to the grade of permanent colonel.

2. A long-range permanent promotion plan was developed and approved early in 1957 (atch #1). This plan was based on the fact that the number of officers who may be selected for promotion to the grade of colonel is a function of the total authorization for colonel and above, the number of officers to be considered, and the time that officers are allowed to occupy the grade. Accordingly, this plan:

a. Provided an annual quota equal to 45% of each new group of eligibles.

b. Was based on the fact that by CY 1963, and thereafter, selection and promotion of new eligibles would be in the 24th year of promotion list service.

c. Assumed that promotion to permanent colonel would remain essentially a confirmation of temporary promotion until the time most regular officers serving in the grade of colonel were permanent colonels.

3. Although this plan provided a reasonable opportunity, it also assured that promotion to the permanent grade of colonel would remain highly selective. This was considered essential in view of the added tenure and the eligibility for future promotion to general officer which are associated with promotion to permanent colonel.

4. The plan was followed precisely in CY's 1957 through 1959. During this period of time, it resulted in 1,075 Line promotions to permanent colonel, all of which were confirmations of temporary promotions. In 1959, however, of the 800 new eligibles, only 156 or 20% were serving in the temporary grade of colonel. This was in direct contrast to all previous years when at least 50% and, in most cases 75%, of the new eligibles were serving as temporary colonels. Of the 156 temporary colonels who first became eligible in 1959, only 40 were selected for permanent promotion. As a result, the remainder of the permanent promotions for CY 1959 (312) went to temporary colonels who were being considered for the 2nd, 4th, 5th, or 6th time.

5. The group of eligibles scheduled to enter the zone in CY 1960 (DOR as permanent lieutenant colonel in 1955-1956) numbers 550, of which only 78 (or 14%) are serving as temporary colonels. Based on the CY 1959 experience of a similar group (e. g., small number of temporary colonels in the total group), it can reasonably be expected that one of two situations would occur if the current plan is strictly followed:

a. Approximately 20 of the new eligible temporary colonels and 200 of the temporary colonels being considered for the 2nd, 3rd, 5th and 6th time would be selected; or

b. The selection board would prefer to give a permanent insignia change promotion to some officers serving in the active duty grade of lieutenant colonel.

6. It is not considered desirable to require that either of these situations occur, particularly when there are approximately 1,000 permanent lieutenant colonels serving in the temporary grade of colonel who would normally be considered for permanent promotion to colonel in the next two years. Many of these officers have already served in the temporary grade of colonel in ex-

cess of five years. Accordingly, the following temporary deviation from the long-range plan has been approved for the programs of 1960 through 1962:

a. All permanent lieutenant colonels with a DOR in 1959 or earlier will be eligible for promotion to permanent colonel each year.

b. No new eligibles will be entered into the primary zone during these three years. However, as a matter of information, consideration is being given to establishing, under existing law, a below-the-zone eligibility in CY 1961 and thereafter. Under this concept, 5% of the total annual quota could be filled by permanent lieutenant colonels who were not in the primary zone, i. e., in CY 1961, those permanent lieutenant colonels with a permanent DOR in 1960.

c. The total quota for the three-year period will be equal to 45% of the new eligibles.

7. This temporary change in the long-range permanent colonel promotion plan reaffirms the fundamental desire of the Air Force to base selections for permanent promotion to the grade of colonel and above on demonstrated performance in the temporary grade where added tenure and assignment to positions of great responsibility are involved.

8. Because of this change in the permanent promotion criteria, a correlative problem arises in the temporary promotion program. There are a limited number of officers—approximately 500—who will now become eligible for permanent promotion to colonel without having been eligible for temporary promotion. To correct this inequity, the criteria for temporary promotion to colonel in FY 1961, and subsequent, will include all permanent lieutenant colonels. This will assure that all permanent lieutenant colonels will have the opportunity to compete for promotion to temporary colonel, and if, selected, perform in the grade prior to consideration for permanent colonel.

9. This temporary change in permanent promotion program will assure that promotion to the grade of permanent colonel will remain highly selective. Subsequent to 1962, it is anticipated that the distribution of temporary colonels will be such as to allow the long-range plan to be followed in the manner originally intended, i. e., permanent promotion to colonel to serve as a confirmation of temporary promotion. This should remain true as long as total active duty officer force exceeds the authorized Regular officer force.

10. Detailed information regarding zones of eligibility is being forwarded separately.

PERMANENT COLONEL SELECTION—45% OF NEW ELIGIBLES MALE LINE OF THE AIR FORCE PROMOTION LIST

Year of Selection	New Eligibles By DOR as L/C	No. to be Promoted	No. to be Retired	Vacancies	Eligibles in Temp Gr	Added in Cols in Grade	Total Eligible
1957	None	300	31	3,381	929	None	1,570

WILLARD—Died at her home at Washington, DC 7 Jun Mrs Cora V Willard, widow of Col Maurice A Willard, USMC-Ret. Burial Arlington National Cemetery.

WARHEAD DETECTION:

RCA Will Work On Project Press

The Army's Philadelphia Ordnance District, under Col. J. G. Duncan III, has awarded a study contract under Project Press—a program to determine the capability of radar and other devices in detection and identification of ballistic missile warheads—to the Radio Corporation of America.

The RCA work in the Pacific Range Electromagnetic Signature Study will be carried out by the Missile and Surface Radar Division at Moorestown, N. J.

"The primary objective of this contract is the design specification of a data handling and a computer complex which will assimilate and process all data acquired on Project Press," Arthur L. Malcarney, Executive Vice President, RCA Defense Electronic Products, said.

He added the study may lead to a design which could yield positive identification of warheads early in their trajectories.

RCA is already at work on Tradex Target Resolution and Discrimination Experiment), also a part of Press. A long range, ultra-sophisticated tracking radar, Tradex will yield a new order of data about the behavior of ICBM's, RCA said.

The study will assess the target complex to determine data handling requirements and how early in their trajectories positive identification of warheads can be achieved.

The entire program is under the supervision of the Army Rocket and Guided Missile Agency and is supported by the Advanced Research Projects Agency.

President Appoints

Two Midshipmen

President Eisenhower has nominated two additional members of the graduating U. S. Naval Academy class for appointment as ensigns.

Midshipman Blaine E. Timmer, jr., was nominated for appointment in the Supply Corps.

Midshipman Henry W. Papa, was nominated for appointment in the Line.

Pentagon Seeks USCOA Changes

From page 3—

“multiple options” would be permitted to exceed 50% of the member's reduced retired pay, provided they do not “separately” exceed 25%.

In requesting changes to bar “poor risks” in the under-18-years’ service category, the Pentagon noted “it is not our intention to completely deny protection under the Act to the families of that group.”

In order to allow these persons to participate, and to “fill the gap in benefits” the proposal would set up a new program which may be entered into at the time of retirement by any eligible member regardless of how or when retired.

Under this new section, the member could elect to establish an annuity which would be paid only if he dies a non-service-connected death.

Thus, his survivors would receive either an annuity from the USCOA program, if the death is non-service-connected, or they would receive dependency and indemnity compensation payable under the Survivor Benefits Act if the death is service-connected. In no case, would they receive both.

The Pentagon said: “In this way, the survivors will be assured of protection regardless of the cause of death and, at the same time, the financial stability of the remainder of the program will be improved.”

The latter plan carries reduced rates of deductions from retired pay “commensurate with the proposed coverage.”

The Pentagon said it would submit a table later, showing the “lower costs under this non-service-connected option.”

Because of its late transmittal to the Congress, the measure is certain not to be taken up before next year and will have to be resubmitted by the Defense Department at that time.

L/C Schenkein Quits Spain For MATS McGuire Post

Lt. Col. George Schenkein, Director of Information for Sixteenth Air Force in Spain since July 1957, has been named Director of Information of EASTAF, MATS Headquarters at McGuire AFB, N. J.

He received a BA in Journalism from Penn State and a Masters Degree in Public Relations from Boston University.

Colonel Schenkein and his wife, Viola, have three children, Robert 15, Patricia 12, and Leslie Ann 5.

Former Bomber Pilot Heads RCA Missile Project

Appointment of G. Denton Clark as Manager of the RCA Missile Test Project at Cape Canaveral, Fla., is announced by S. D. Heller, Vice President of Government Services, RCA Service Company.

The project involves range instrumentation activities at Canaveral.

Mr. Clark was named Manager of Communications Engineering for the Ballistic Missile Early Warning System (BMEWS) service project, an activity of the RCA Service Company, with headquarters at Riverton, N. J., in January 1959. He became Manager of Site Operations at Thule, Greenland, in October 1959 and was in charge of the activities at the BMEWS site at Clear, Alaska, at the time of his appointment to the Missile Test Project post.

A native of Summerside, Prince Edward Island, Canada, Mr. Clark received a B.S. degree in electrical engineering at the University of New Brunswick, and a master's degree in communications engineering at McGill University, Montreal.

During WWII, he served as a bomber pilot and flying instructor in both Canada and Great Britain. He was an engineering officer in the Canadian Army during the Korean War.

L/C Frank Will Get Top AMF Info Slot

Lt. Col. Milton Frank will become Air Materiel Command's Information Chief 10 July.

Col. Frank

Colonel Frank, who has been serving as Director of Information at Wright Air Development Division for the past two years, succeeds Col. Julian B. Cross, who departs next month for Honolulu, Hawaii, where he will become Pacific Air Force Director of Information.

A graduate from the University of California at Berkeley in 1941 with a Bachelor of Arts degree, where he majored in public speaking and journalism, Colonel Frank completed a year's course in radio communications at Healds Engineering College in San Francisco. He received his Master of Science degree in public relations from Boston University in 1957 and is a member of the Public Relations Society of America.

He entered service as an aviation cadet at San Francisco in January 1942, and was commissioned in May of that year. His military assignments have been in both the public information and communications-electronics fields, including service in the China-Burma-India theater from March 1944 to August 1945 and in the Pacific theater from August to November 1945, which was followed by assignments to Strategic Air Command. From 1950-54, he was assigned to Air University, both as a student and instructor. From 1954-57, he served as a member of the MAAG in Lisbon, Portugal.

Colonel Frank has been awarded the Air Medal, Distinguished Unit Citation with two Oak Leaf Clusters, and the Commendation Ribbon with one Oak Leaf Cluster.

THOR CHIEF

New Chief Project Engineer for Thor Systems at Douglas Aircraft Company is R. S. Saye. He succeeds H. M. Thomas, appointed Saturn Program Manager for Douglas.

Mr. Saye was assigned to the Crash Thor Program in 1956, and later was named Assistant Chief Project Engineer. Before joining the Thor Project, he was a Hydraulics Expert on the Company's Nike Missile activities.

Other new Douglas appointments in the Thor Project are D. E. Brimley, Assistant Chief Project Engineer, N. J. Heckman, Project Engineer, Field Station Testing, and W. H. Hess, Project Engineer, Missile, Ground Support Equipment and Contract requirements.

Redstone To White Sands

Brig. Gen. John G. Shinkle, Commanding Officer of the Army Rocket and Guided Missile Agency, Redstone Arsenal, Ala., will become Commanding General of the White Sands, N. Mex., Proving Ground. He succeeds Maj. Gen. Waldow Laidlaw, who retires at the end of this month.

Col. J. G. Zierdt, General Shinkle's deputy at Redstone, will succeed him in that post.

Royal Falcons For USAF Academy

TWO royal falcons, gifts of King Saud of Saudi Arabia, were presented at graduation ceremonies last week to the Cadet Wing at the U. S. Air Force Academy at Secretary Dudley C. Sharp. Participating in the presentation ceremony are Maj. Gen. William S. Stone, Superintendent of the Academy, left; and Cadet Lt. Col. Richard W. Arnold, Commander of the Cadet Wing, who accepted the falcons. Holding the one-year-old saker falcons are two of the Academy's cadet falconers, Daryl P. Wood, center; and Roger K. Johnson, Secretary Sharp accepted the Saudi king's gift on behalf of the Academy 26 May during a visit to Saudi Arabia.

The royal falcon gifts are named "Sattan" (Sat-tahn), meaning "the shield or protector," and "Midbag" (Mid-bag), translated "high-speed." Secretary Sharp said "high-speed" could further be translated to mean Mach, speed of sound, the name by which all Air Force Academy falcon mascots are known.

Coast Guard Orders

From page 31—

trict, heads the list of Coast Guard officers retiring at the end of this month. Other officers scheduled to retire include:

Captains Arthur J. Hesford, Edward W. Laird, and John W. Ryssy;

Commanders James C. Campbell, Howard M. Sias, and John B. Swann, jr.;

Lieutenant Commanders LeRoy Flatt, and Henry J. Pfeiffer;

CWO-4 Wendelin B. Sonntag and Royce O. Tackett;

CWO-3 Andrew Hauswirth, Robert A. Johnson, and Bernard A. Koebbe;

CWO-2 William H. Hudson and Charles R. Lee.

ASSIGNMENT CHANGES

Commander

Perry, Ellis L, HQ (Designated Asst. Ch. ENE Div.).

Lieutenant Commander

Daniel, Leonard A, CGAD, Annette Island (Designated XO).

Dean, Bertrand S, CGD12 (TEM) to PSU, Alameda (CO).

Von Elm, Robert G, IRIS (CO) to CGD5 (Asst Dir. of Res.).

Lieutenant

Allen, William P, CGD14 (RCC) to Base, Alameda (Res. Trng. Prog.).

Decker, Lynn I, TraSta, Groton (Elect. Engr) to HQ (EEE).

Doughty, James I, CGAS, Brooklyn (Difot) to CGAD, Barbers Pt (Difot).

Happel, ESCANABA (EO) to CGD8 (mmt) Happel, Jaul R, ESCANABA (EO) to CGD8 (mmt)—CANCELLED. ESCANABA (EO) to MIO, Boston (Duty).

Jones-Bateman, John B, jr, STD#1 (CO) to INGHAM (Engr Duty).

Tindle, Ernest R, FT/D Unit, Curtis Bay (Duty) to HQ (ECV).

Lieutenant (Jg)

Burgess, Frederick F, jr, HALFMOON (Duty) to STD#1 (CO).

Carman, Frank H, jr, DUANE (Engr Trng) to BARATARIA (Engr Duty).

Janda, John J, jr, CAMPBELL (Engr Duty) to MIO, Boston (Duty).

Knauff, Robert P, Group, New York (Duty) to OAK (XO).

McDowell, Samuel A, jr, RCA Institute, N.Y. (Duins) to CAMPBELL (Engr Duty).

Nichols, Roy E, INGHAM (Engr Duty) to RTC, Yorktown (TEMINS/MM Indoc) thence MIO, Philadelphia (Duty).

Opezo, Lawrence J, BARATARIA (Engr Duty) to Base, San Juan (EO).

Sullivan, James O, WPB-95316 (CO) to NAS, Pensacola (Basic Flt Trng).

Wallace, James E, WINNEBAGO (Duty) to

Col. May Commands Schenectady Depot

Col. Robert W. May has assumed command of Schenectady, N. Y., General Depot.

He succeeds Col. James F. Quinn, who goes to Japan.

Colonel May resides at the Depot with his wife, the former Virginia Webb and daughter, Mariquita.

SAC Loses Defense Division To USAFE

The 65th Air Division (Division) at Torrejon AB, Spain, will be transferred 1 July from SAC to U. S. Air Forces Europe.

Commanded by Col. Clay Tice, jr., the 65th provides air defenses for U. S. installations located on the Spanish peninsula.

It has been under operational control of USAFE since 1 April.

Lt. DeWitt To Knox

Second Lt. John L. DeWitt, 3d, Armor, USMA '60, goes to USAARMS, Ft. Knox for TDY in August. He will go to his permanent duty assignment in Germany next May. He is the son of Lt. Col. J. L. DeWitt, USA-Ret., and the grandson of General DeWitt, USA-Ret.

CGD14 (RCC). Watterson, Robert J, OAK (XO) to NAS, Pensacola (Basic Flt Trng). Wilson, Peter S, COOK INLET (Duty) to ACUSHNET (Duty).

Ensign

Allison, Albert J, CASTLE ROCK (Duty) to NAS, Pensacola (Basic Flt Trng).

Campbell, John D, CASCO (Duty) to NAS, Pensacola (Basic Flt Trng).

Davis, Jimmie J, WINONA (Engr Duty) to RTC, Yorktown (TEMINS/MM Indoc) thence MIO, Chicago (Duty).

Thornhill, Jackie S, DEXTER (Engr Duty) to RTC, Yorktown (TEMINS/MM Indoc) thence MIO, New Orleans (Duty).

CWO, W-4

Midgett, John E, Sullivan Island LBS (CO) to Depot, Baltimore (CO).

CWO, W-3

Stanley, Louie W, COTP, Jacksonville to Sullivan Island LBS (CO).

INDUSTRY IN DEFENSE

Senate Committee Seeks Bigger Share Of Prime Contracts For Small Business

THE Senate Appropriations Committee has charged that small businesses are not getting their fair share of Defense Department prime contracts, and has taken steps to rectify the "serious situation."

The Committee said the "percentage share of military prime contracts has spiraled downward from a high of 25% in fiscal year 1954 to 16% in fiscal year 1959."

"This," the Committee declared, "affords a sad commentary on the effectiveness of the small business program of the Department of Defense."

As a corrective step, the Committee has told the Pentagon that sole source procurements made with funds appropriated in the fiscal '61 military appropriations act "should be kept at a minimum."

Also, the Committee said all procurements made of \$10,000 and above, which are financed from the fiscal '61 funds, "should be publicized" in order to increase competition.

To publicize such procurements, the Committee has told the Defense Department that "all procurement actions except those which for security reasons are of a classified nature or which involve perishable subsistence supplies shall appear in the daily publication 'U. S. Department of Commerce Synopsis of the U. S. Government Proposed Procurements, Sales and Contract Awards' immediately after the necessity for the procurement is established."

USNA Grad Will Direct Typhon Anti-Air System For Westinghouse

James M. Beggs, a USNA graduate, will manage a new weapon control department responsible for all aspects of the weapon control subsystem of the Navy's new Typhon fleet anti-air warfare system, it is announced.

The announcement was made by Buford M. Brown, Vice President in Charge of Westinghouse Electric's Baltimore divisions, where Mr. Brown has been Manager of the Ordnance Department.

The Navy and Westinghouse announced the new Typhon system in April. At that time the Navy described the Typhon as "a new concept in anti-air warfare which will greatly extend the range, accuracy, target-handling capacity, and quick reaction capability of the Navy's guided missile warships of the future."

Westinghouse has been awarded a \$38.5 million contract for the development, design, and production of a prototype model of the long-range radar portion of the new system. This project and all other Typhon weapon control functions assigned to Westinghouse will be conducted by the new department. As department manager, Mr. Beggs will report to R. E. Kirby, General Manager of the company's Electronics Division in Baltimore.

TEMCO Opens New Office At Huntsville

Temco Aircraft Corporation of Dallas has opened a new regional sales office at Huntsville, Ala., home of the Army Ordnance Missile Command.

Robert E. Brown, formerly a sales engineer in the Contracts and Customer Liaison Departments at Temco's home offices, will be manufacturer's representative to Redstone Arsenal and other agencies in the Huntsville area. His office will be in Suite No. 14, Holiday Office Building, Memorial Parkway South, Huntsville.

A sailplane enthusiast, Mr. Brown has entered several regional and national soaring competitions during the past few years. He joined Temco as a production engineering coordinator more than three years ago after extensive experience with other aerospace firms.

Opening of the Huntsville office will put new emphasis on Temco activities in the South. Other Temco representatives and offices are in Washington, New York, Dayton and Los Angeles.

Hallicrafters Boosts Military Research

The Hallicrafters Company, Chicago electronics engineering and development firm, has purchased 30 acres of property in Northwestern Industrial Park, Rolling Meadows, Ill., for a new research facility.

Robert F. Halligan, Executive Vice President, said that research laboratories and engineering facilities for the company's military defense work will be concentrated in the new plant. Laboratories will include antenna, ground equipment, heat transfer, microwave power, ground support equipment, automatic equipment, military communications, reconnaissance, reliability and environmental testing, SAGE (semi-automatic ground environment), and traveling wave tube applications.

Mr. Halligan stated that the company's production facilities for military work and commercial products will be expanded in its Chicago plant.

HUGHES SCORES NAVY MISSILE "FIRST"

THE Navy has awarded a \$7.5 million contract to the Hughes Aircraft Company, Culver City, Calif., to build guidance systems for Polaris fleet ballistic missiles and provide additional tooling for production at the Hughes El Segundo, Calif., manufacturing division.

This marks the first time Hughes will be a prime contractor with responsibility to the Navy for the entire guidance system. Heretofore, the company has been a sub-contractor building guidance components.

Under a dual source supply plan, the Navy will buy the POLARIS guidance system from two independent contractors. One source is a team headed by Hughes and includes Minneapolis-Honeywell Regulator Company. The other is the General Electric Company.

Air Force Reaches Accord With Railroad Association On Minuteman Missile Tests

THE Air Force and the Association of American Railroads have signed an agreement calling for a series of train tests to study the use of existing railway facilities to carry mobile Minuteman ICBMs.

The agreement was signed by General Thomas D. White, CofS, and Mr. Daniel P. Loomis, President of the Association of American Railroads. It covers services to be rendered to the Air Force by the AAR.

The test program will be conducted during the period of June-November 1960. The first test run will originate at Hill AFB, Utah, 20 June. Hill will serve as control center for the tests. Deployments will be under operational control of a Strategic Air Command Task Force and the Air Force Ballistic Missile Division will serve as test director. More than 20 American railroads are expected to participate in the tests.

Each test train deployment will last from 7 to 14 days. The first three deployments will originate from Hill, site of the Train Control Center, and movement will be in the Western and Northwestern parts of the nation. The last three test runs will originate from Des Moines, Iowa, and cover the Iowa-Nebraska area.

The test trains will be composed of Department of Defense owned rolling stock. No missile hardware or associated ground support equipment will be carried during the first deployments, which are designed chiefly to test control and communications. In later tests it is anticipated that engines for the Minuteman will be mounted on flat cars to determine stress and strain factors associated with rail movements.

The initial test train will consist of about 14 cars, including a command and control car with single sideband radio and UHF equipment linking the test train commander with Hill and the SAC Command Post at Offutt AFB, Nebr. Engine and train operation crews will be furnished by the railroads whose facilities are used during the tests. The military train crew will be composed of SAC personnel, including the Train Commander and officer and airmen specialists to control communications, operations, administration, food services, water purification and sanitation, security and medical services.

Col. Barron Named To Link Sales Post

Joseph W. Barron has joined Link Division, General Precision, Inc. as Government Sales Manager, and W. Ray Hanks has been appointed Research Sales Manager.

Both will be stationed in Washington, D. C., with Mr. Barron reporting to the Vice President-Sales, Lloyd L. Kelly.

Mr. Barron reverted to inactive duty in the Air Force with the rank of Colonel in 1954. His service career included posts in Brazil, Washington, and at Wright-Patterson AFB, Ohio.

Mr. Hanks served as a Naval officer during WWII, assigned as project officer with the Bureau of Aeronautics and the Office of Naval Research.

Kearfott Research Chief Has Varied Military Past

Kearfott Division, General Precision, Inc., Little Falls, N. J., has named Z. R. S. Ratajski, as Chief of Research and Advanced Development, Precision Components Division.

During WWII he served as a captain in the Polish Air Force, Sous Lieutenant in the French Air Force and Flight Lieutenant in the Royal Air Force.

Mr. Ratajski has served as U.K. representative on technical committees of NATO, and as a U. S. Navy representative on components in England.

Kearfott develops and produces components and systems for major aircraft and missile programs and employs more than 6,000 persons in 14 New Jersey, North Carolina, and California plants.

Senate Bill Adds \$1.168 Billion To Defense Budget; More For Army Modernization

MORE than \$200 million in additional funds to accelerate Army modernization and to speed work on the Samos reconnaissance satellite have been voted by the Senate Appropriations Committee.

In other last-minute changes to a \$40 billion measure reported by its Military Subcommittee, the full Committee also restored a House-imposed \$80 million set-aside for procurement of commercial airlift, and added \$10 million to Air Force funds for procurement of F-27 prop jet transports.

The Senate bill now totals \$40,384,897,000. This is \$1,168,997,000 more than President Eisenhower requested, and is \$1,047,030,000 more than the amount voted by the House.

The Committee approved earlier recommendations of its Subcommittee (THE JOURNAL, 11 June) which restored a number of House cuts, including:

- \$294 million for Bomarc.
- \$293 million for a Navy carrier.
- \$84.3 million for communications facilities.
- \$400 million in procurement funds.
- \$15 million for proficiency flying.
- \$15 million for travel.
- \$20 million for headquarters staffs.
- \$3.4 million for mission support flying.

Funds added by the House which both the Senate Military Appropriations Subcommittee and the full Senate Committee refused to accept included:

- \$115 million for an airborne alert.
- \$215 million for F-106 fighter aircraft.
- \$58 million for ASW research and development.
- \$50 million for two destroyer escorts.

\$57 million for a nuclear attack submarine.

- \$20.2 million for the Discoverer and Midas satellite programs.
- \$20 million to accelerate the Minuteman ICBM.

Some of the funds voted by the House were accepted or rejected only in part. In some instances, the Senate Committee added to the House amounts, and in other instances the House approved funds were decreased. The Senate group approved:

- \$200 million of the \$250 million voted by the House for airlift modernization.
- \$360 million for the B-70 bomber program. This is \$285 million more than the amount requested by the President and approved by the House.
- A \$9 million additional cut in funds for the maintenance of Wherry and Capehart military family housing. Added to a previous House cut of \$11 million,

this boosts the total reduction to \$30 million.

• A \$50 million increase in the \$33.8 million already added by the House to speed work on the Samos reconnaissance satellite.

• A House increase of \$105.4 million to maintain the Army National Guard and Army Reserve at 400,000 and 300,000 respectively. The Senate Committee added language which makes maintenance of the strengths mandatory.

• \$125 million for Army modernization, in addition to funds already voted by the House. This is \$162 million more than the President had requested, and does not include \$120 million (above the President's request) which the House earmarked for the Army, and which the Senate Committee approved, if these funds or any part of them, become available as a result of shelf-sales to the military Assistance Program.

Capitol Action Confronts Retired; Senator Suggests New Inquiry

PRESIDENT Eisenhower's nomination of Maj. Gen. John S. Bragdon, USA-Ret., and VADM. Ralph E. Wilson, USN, to fill top slots in two Federal regulatory agencies has erupted into a hot Senate issue.

The controversy threatens to force full-scale study of the military retirement

system, and focuses new attention on the Hébert officer employment bill.

Senator Clair Engle (D-Calif.) suggested a "long look" at the retirement system during floor discussion of the appointments.

He said: "If we were to revise the retirement law under which these indi-

viduals are stepping out of the military, with very fat pensions, at 45, 50, and 55 years of age, full of beans, and ready to go out and work, we would not have them hopping around, getting into these civilian positions."

Senator Engle said it was not his intention to "cast any reflection" upon either General Bragdon or Admiral Wilson, both of whom "have distinguished military records," but he believes a line should be drawn "here and now" to foreclose any further appointments of military officers to such posts before "we find ourselves with a second Pentagon in the regulatory and administrative agencies."

General Bragdon, currently serving at the White House as Special Assistant to the President, has been nominated to be a member of the Civil Aeronautics Board. He is 67, and has been retired since 1951.

Admiral Wilson, Deputy CNO for Logistics, slated to retire soon, was nominated to be a member of the Federal Maritime Board. He will be 58 this month.

Both nominations have been reported favorably to the Senate by the Committee on Interstate and Foreign Commerce of which Senator Engle is a member.

While recommending "favorable action" on the two nominees, the Committee expressed "substantial doubts" about the "wisdom of repeated appointments of retired military officers to high civilian positions, particularly in the administrative and regulatory agencies."

The Committee said it could not agree with Senator Engle, however, "that if a line has to be drawn it should be drawn here."

At the same time, the Committee noted that "an appointment to an agency is not an honorarium for services performed in the past. Rather, such an appointment should be based on expected future performance in the highly sensitive area of balancing and adjusting competitive forces in the public interest."

The Committee also remarked that "one of the basic principles of our society is that the control of government, including the policymaking function, should be vested in civilians with the military subordinate. Continued appointments of career officers could destroy the symbol of civilian government as well as promote the unfortunate practical effects associated with almost dominant military influence."

Appointment of a military man "should be the unusual rather than the usual," the Committee said.

Senator Engle, in "individual views" published as a part of the Committee report, said he could not concur with the Committee recommendation that the two officers be confirmed.

He said: "This Administration, and others before it, have found it easier to tap retired career officers for public service than to search further for qualified civilians." He said he has no doubt that in the maritime and aviation industries "there are many outstanding men who would be willing and honored to hold appointments on these Boards."

Senator Engle pointed out that the head of the Maritime Administration "is another retired admiral," and the head of the Federal Aviation Administration is a retired Air Force general.

He said the FAA "presents a good illustration of a Government department where military men have been moved into key control positions." He listed three brigadier generals, 14 colonels, three Navy captains, nine lieutenant colonels and one commander who occupy FAA "key positions," and said he understands that the FAA's research and development bureau "is almost completely under military domination."

During Senate floor discussion of the appointments, Senator Gale McGee (D-Wyo.) asked Senator Engle: "I wonder if the Senator does not believe the seriousness of the question he has raised is compounded by the number of admirals and generals who also are taking over corporate leadership of private groups in the country, beyond the scope of the jurisdiction of the committee? Does that not

point up the importance of trying to retain some independent civilian judgment in these regulatory agencies?"

Senator Engle said: "It certainly does. I would a lot rather have these men serving in private industry than have them running the civilian regulatory agencies, but, at the present time, the Committee on Armed Services, of which I am a member, is investigating the proposition that these retired military officers go into the defense industries and then exercise, so it is asserted, some influence with reference to the allocation of defense contracts. I would prefer to have these men serve in industry, but if we have them on both sides, as the Senator suggests, it presents a deeper problem."

At another point in the discussion, Senator John A. Carroll (D-Colo.) said: "The time has come now to put the military in their proper place, where they can function before they retire to civilian life. If a corporation wants to hire them—and I do not disapprove of it if they keep away from the Pentagon and Government contracts—they can do so. The House committees have done excellent work in studying this matter. I believe the Senate should pay attention to what is happening."

Senator McGee said: "As military personnel more and more dominate the private sector of our life in this country, it only accentuates the importance of trying to maintain nonmilitary surveillance of the public agencies. It only makes the problem more acute."

Senator McGee recalled that the Hébert House Armed Services Investigations Subcommittee had found that 72 large corporations are employing 1426 retired military officers. "Thus," he said, "we find this attack coming from both directions simultaneously—not only upon the public agencies, which are designed to regulate in the public interest, but

REPORT DUE SOON

The Senate Armed Services Committee, as The Journal went to press, was awaiting a report from the Pentagon on the Hébert Bill.

After hearing Chairman Carl Vinson (D-Ga.) of the House Armed Services Committee, who asked passage of the Pentagon legislation, and Representative F. Edward Hébert (D-La.), who asked for tough criminal statute action, the Senate Committee called upon the Pentagon for its views.

Defense Department lawyers are working on the report. One of the questions on which they must rule is the Constitutionality of making retired Reserve officers subject to the court-martial penalties of the Uniform Code of Military Justice. This was recommended by Chairman Vinson in answer to Pentagon views that the measure should apply to Regulars and Reservists alike.

upon private agencies, namely, corporations which are now dealing with the public agencies. So there is, in fact, a cozy club, with the same people talking to their own kinfolk in the profession. The public has been left out of consideration."

Senator Engle said he thinks the Armed Services Committee "ought to take another look at the military retirement system which turns these officers loose so young. They are available today because they are in a period of life when they are very active and vigorous. I think their services ought to be utilized—in the military, if they can be kept there for a somewhat longer period; if not, certainly not in the regulatory agencies; certainly not in the defense contracting area, where no matter how circumspect they undertake to be, nevertheless accusations will be made that disparage the honesty of both sides. We ought to be very careful about that."

RETIRED ACTIVITIES:

General Bradley Heads Cancer Institute; M/G Cousins Gets Life Insurance Post

General of the Army Omar N. Bradley, Board Chairman of Bulova Watch Company, Inc., has been elected Chairman of the Eleanor Roosevelt Institute for Cancer Research. He will direct a nationwide program to establish cancer research institutes in hospitals and medical schools.

The first project is under way at American Medical Center in Denver where the Institute is paying for the care of 32 cancer patients.

Maj. Gen. Ralph P. Cousins, USAF-Ret., has been named Resident Vice President of the new Los Angeles Western Division Office of American Travelers Life, Indianapolis. President Roy A. Foan said the new Western headquarters will be opened 23 June at 219 West 7th St., Los Angeles. General Cousins, USMA '15, has been Vice President and Secretary of Founders Insurance Company since 1946 when he retired.

Maj. Louella Owen, ANC-Ret., 2401 East Club Drive, N.E., Atlanta, Ga., is the nurse member of a USPHS Research Team at Georgia Tech, investigating Disposable vs. Reprocessed Hospital Supplies. Prior to her retirement at Ft. Belvoir, Va., in June 1959, she served as Nursing Methods Analyst at Army hospitals in Honolulu and in Virginia.

Lt. Gen. Clarence R. Huebner, USA-Ret., New York, Director of Civil Defense, was at Brooke Army Medical Center, Ft. Sam Houston, Tex., 13-17 June to address the course in Management of Mass Casualties at the Army Medical Service School.

Maj. Gen. Elbert DeCoursey, MC, USA-Ret., former Commandant of the Army Medical Service School and now Director of the Southwest Foundation for Research and Education in San Antonio, spoke on Biological Effects of Ionizing Radiation.

Capt. John A. Lewis, AUS-Ret., is residing at 692 Grand Street, Brooklyn 11, N. Y.

Col. Ralph T. Simpson, USA-Ret., has accepted a position as Assistant Dean of

Students at the University of Arkansas. Colonel and Mrs. Simpson reside at 412 Ila Street, Fayetteville.

Lt. Col. Aaron H. Horland, USAF-Ret., 1 Oval Road, Millburn, N. J., is an Air Line Medical Examiner in Region 1. He assists several air lines in servicing flight personnel. In addition, Colonel Horland is engaged in research on survival in space. He served on active duty in the North Atlantic area and retired as Flight Surgeon at Mitchel AFB, N. Y.

Five Retire At Ord

Col. Stephen E. Morris, USA-Ret., former Signal officer for the 2d Logistical Command, Ft. Ord, Calif., his wife, Jody, and their two children, Stephanie and C.J., will make their home at 204 Crocker Ave., Pacific Grove, Calif.

Lt. Col. Robert S. Bates, USA-Ret., was Executive Officer of Control Headquarters, Combat Development and Experimentation Center (CDEC) at Ord.

Lt. Col. Joseph A. Katalinas, USA-Ret., was Commanding Officer of 3d Battle Group, 1st Brigade at Ord after serving as Chief of the Communist Far East branch office, Office of the Assistant CofS, G-2, U. S. Army, Pacific. Colonel Katalinas and his wife, Regina, have four daughters, Jeanne, 19; Joan, 17; Dara, 10; Gina, 6, and a son, Peter, 16.

Also ending their careers at Ord were Maj. Howard MacKay, USA-Ret., Signal officer of CDEC Control Headquarters; Maj. Joseph B. Byrnes, USA-Ret., Assistant Provost Marshal, who will make his home with his wife, Lois, and three children, Raymond, 15, John, 3, and Janice, 1, at 20097 John Dr., Cupertino, Calif.; and Maj. Eugene P. DeLeon, CDEC Project Officer, who lives with his wife, Marian, and three children, Charles, 11; Ann, 9 and Mary, 7 at 1938 Marchetta Lane, Pebble Beach, Calif.

BIG EAR

North American Aviation's Columbus, Ohio, Division has received a \$9.1 million contract to build the world's largest radio telescope reflector—bigger in area than six football fields—which will be tuned to sounds from outer space.

W. H. Yahn, President of the NAA Division, said the contract calls for fabricating and assembling an aluminum "dish" 600 feet in diameter across the top and providing a concave surface of more than seven acres.

Standing upon its tower at the Navy's site Sugar Grove, W. Va., the dish will rise higher than a 60-story building. It will be able to revolve upon a track in a complete 360-degree circle and to tilt up and down from 0 to 90 degrees.

The telescope will be the largest movable structure in the world.

The largest existing radio telescope, at Jodrell Bank in England, uses a 250-foot paraboloid. This is less than half the size of the new reflector to be built by North American. The basic installation is already under way. When the telescope is completed it will have cost more than \$100 million.

PL 810 Retirements

The Army has placed the following National Guard and Reserve officers on the retired list upon their attainment of age 60 and completion of at least 20 years creditable service as provided under Title III, PL 810, 80th Congress:

Brigadier General	
Chamberlin, R. W.	McCormick, C. S., Jr.
Colonel	
Huempfer, W. J.	Keyes, W. E., NG
Cochrane, Warren O.	Silva, Alvin K.
Lubitz, Benjamin	Hayward, Charles P.
Hausser, Frederick H.	Bass, James W.
Sweeney, Leo P. A.	
Lieutenant Colonel	
Smiley, Frank H.	Davis, Harold C.
Schnette, Robert F.	Keller, George F.
Weber, Walter C.	Morey, Carlyle J.
Lucke, Charles B.	Iseminger, Boyd A.
Major	
Sealion, Hubert J.	Schenck, Herschel W.
Denman, R. S., NG	Goldstein, Jacob M.
Ravitz, Samuel F.	Ball, James I.
Captain	
Thompson, Merrill R.	Bowers, F. A., sr
Scheerer, John B.	
Chief Warrant Officer	
Andrews, Harry S., NG	

LAND IMPROVEMENT

IN LANE COUNTY, OREGON

Along the Oregon coast, Lane County's D6 cuts a road to the ocean for a new recreation area near Florence. Lane County, stretching from the Cascades to the Pacific, depends on its D6 and 18 other Caterpillar-built machines to carry out road maintenance and construction programs. Multimillion-dollar road programs, new state parks... these are the things being done in Lane County. County Road Engineer H. O. Walberg commented on their Cat-built equipment: "We're well satisfied with our Cat equipment for two big reasons... big production and little down time. And when we need dealer service, it's there! The D6 is particularly useful to us. It's small enough to work in tight places, but big enough to tackle tough jobs."

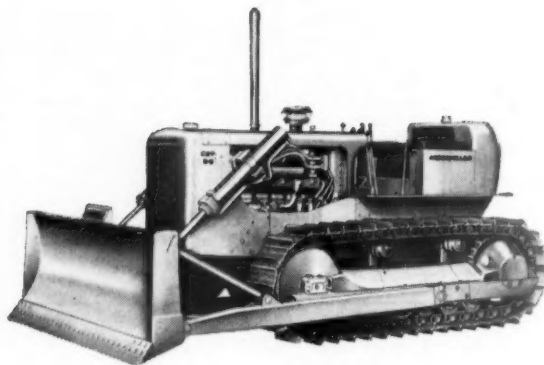

MACHINE IMPROVEMENT

BY CATERPILLAR

There's a new D6... the Series B... just introduced by Caterpillar. On the same jobs, on tougher jobs, this new work-styled D6B sets production peaks unheard of from a machine in its size class. It has more than just improvements... the all-new compact Caterpillar Diesel Engine, the D333, boosts lugging ability 25%. A new integral hydraulic system (optional) puts power where it's needed... at the tools. Center-pivoted cylinder mounting gives increased lift/drop range. Under-the-hood location of tank, pump and valves permits convenient routing of hydraulic lines to bulldozer or implement cylinders... frees the front and rear for working tools. The operator's cockpit is all new. Controls make the tractor handle almost as if it knew what was needed next.

The exclusive Caterpillar oil clutch is standard on the D6B. It provides up to 2,000 hours of adjustment-free operation. Lifetime lubricated rollers need no lubrication until rebuilding... help roll up more operating time instead of repairs. The dry-type air cleaner removes at least 99.8% of all dirt from intake air. Can be serviced

in five minutes. Cuts maintenance time by as much as 75%. Optional hydraulic track adjusters are another time saver. A grease gun is all that's needed to assure proper track adjustment.

The Caterpillar D6B comes to you thoroughly tested under demanding earthmoving duty. It's designed to set new records in production and economy.
